### Program Educational Objectives (PEOs)

The **M. Sc. Environmental Sciences** program describe accomplishments that graduates are expected to attain within five to seven years after graduation

<b>PEO1</b>	The students could get employment opportunities in Central Pollution Control Board (CPCB) and State Pollution Control Board (SPCB), Research Institutions, Colleges, Universities and Non-governmental organizations.
<b>PEO2</b>	After successful completion of the course, the students could get job opportunities in urban and rural environmental mitigation and awareness including social forestry programs, bio-fertilizer and bio-pesticide industries, waste management and organic farming divisions funded by National, International and Regional agencies.
<b>PEO3</b>	The students could get employment perspectives in R & D laboratories of waste water treatment plants, metal, chemical and textile effluent treatment plants, municipal solid waste management units and waste management in biomedical industries and hospitals.
<b>PEO4</b>	The students could find employment opportunities in agro industries, forest departments, water harvesting and watershed management sectors, bio-resource utilization and biodiversity conservation organizations, food and feed Industries, environment friendly and integrated livestock management sectors.
<b>PEO5</b>	Students also having the immense opportunities to pursue higher studies in various research fields such as environmental pollution, environmental chemistry, waste management and bioremediation, environmental microbiology, waste water treatment, recycle, reuse and management, sustainable environmental food security, bio-resource utilization and biodiversity conservation, functional and ecosystem ecology, environmental toxicology, agro-waste ecosystem, non-biodegradable synthetic chemicals and polymers in environment, occupational health and industrial safety, environment analytical techniques, environmental impact assessment, remote sensing and geographical information system, environmental biotechnology, carbon sequestration, natural disaster management and mitigation, climate change, marine pollution and resources utilization, restoration of different ecosystems, renewable and green energy and environmental law, policies and auditing.

<b>PROGRAMME SPECIFIC OUTCOMES (PSOs)</b>	
<b>CERTIFICATE IN ENVIRONMENT UNDERSTANDING</b>	
<b>FIRST YEAR</b>	<p>The aim is to build conceptual understanding of students by exposing them to the basic principles behind various environmental processes.</p> <p>To introduce students to the basic concepts of ecology its different branches, scope and ecosystem dynamics along with the various ecosystem functions. They also be able to understand the good laboratory practices, meteorological parameters and to know the strategies for sustainable management and carrying capacity.</p>
<b>DIPLOMA IN NATURAL RESOURCES AND MICROBIAL BIOTECHNOLOGY</b>	
<b>SECOND YEAR</b>	<p>To enrich the knowledge on biodiversity its value and various approach for conservations. Make students aware of biodiversity of India, biogeographic zones and role of local communities and traditional knowledge in conservation. Educate the students on source, classification, and impact of air, water and soil pollution. The students will also recognize the various control measures of pollution problems. Understand the solid waste pollution, noise pollution, radioactive and thermal pollution and related consequences. In addition also get the knowledge of sustainable management of wastes.</p>
<b>DEGREE IN BACHELOR OF SCIENCE</b>	
<b>THIRD YEAR</b>	<p>To develop the understanding on natural resources and their significance and to know the strategies for sustainable management. Understand the basic principles and application of remote sensing and GIS techniques. Impart knowledge on microbial diversity and recent advancement methods in the analysis of microbial diversity. Provide in-depth knowledge of role of beneficial and pathogenic microorganisms in environment.</p> <p>Understand the application of microbes for production of different eco-friendly products. Impart knowledge in molecular biotechnology and its applications in Environmental management and conservation. Make students aware about Bioethics, biosafety and IPR.</p> <p>Understand the basic laws, act, treaty, public policies and PIL. Environment provisions in constitution, power and functions of government agencies for pollution control. To introduce students to the general environmental awareness, current environmental priorities in India and basic of statistics and instrumentations.</p>

Programme/Class: <b>Certificate</b>		Year: <b>First</b>	Semester: <b>First</b>
Paper-1 Theory		Subject: <b>Environmental Sciences</b>	
Course Code: B150101T		Course Title: <b>Fundamentals of Environmental Sciences</b>	
<b>Course outcomes:</b> After completing the course the student will be able to: <ul style="list-style-type: none"> <li>• Learn fundamental concept of environmental science</li> <li>• Develop understanding about environmental education, justice and environmentalism.</li> <li>• Gain knowledge about origin of life and related theories.</li> <li>• Able to understand the relationship between man and environment.</li> <li>• Understand the structure and composition of different sphere of earth.</li> <li>• Also able to understand the different meteorological parameters.</li> </ul>			
<b>Credits: 4</b>		<b>Compulsory</b>

Paper-2Theory	Subject: <b>Environmental Sciences</b>	
Course Code: B150602T	Course Title: <b>Environmental Priorities and Research Tools</b>	
<b>Course outcomes:</b> After completing the course the student will be able to: <ul style="list-style-type: none"> <li>• Learn about general national environmental movements.</li> <li>• Able to understand the environmental priorities in India.</li> <li>• Develop understanding about different environmental disasters and their management.</li> <li>• Gain knowledge on basic of statistics and instrumentation.</li> </ul>		
<b>Credits: 4</b>	<b>Compulsory</b>	
Max. Marks: 25+75	Min. Passing Marks: As per norms.	
Total No. of Lectures-Tutorials-Practical (in hours per week): L-T-P: 4-0-0		
Unit	Topic	No. of Lectures
I	<b>National Environmental movement:</b> Silent valley movement, Chipko movement, Narmada movement, Green Revolution, Appiko movement, Tehri Dam movement; Namami Gange and Yamuna Action Plan; International Solar Alliance.	12
II	<b>Environmental Priorities in India:</b> Sustainable Development; Urban and Rural planning, Power generation; Human Population Explosion; Environment and human health; Sanitation and health education; Role of information technology in environment and human health.	10
III	<b>Environmental Disaster &amp; Toxicology:</b> Natural hazards; earthquake, flood, cyclones, landslides, desertification and fire; Resettlement and rehabilitation process; NDRF/SDRF; NDMA; Introduction and nature of toxicity (acute and chronic), Dose and time response relationship, Teratogenicity, Carcinogenicity and mutagenicity.	14
IV	<b>Biostatistics:</b> Introduction and historical perspective; definition; characteristics and application of biostatistics; statistical terms and symbols; mean, mode and median; variance and standard deviation.	14
V	<b>Instrumentation:</b> Introduction to Techniques, Basic principles, and applications- Centrifuge; colorimetric, volumetric, titration, Conductometry; Nephelometry; Gravimetry; Microscopy; Ultraviolet-visible (UV- VIS) Spectroscopy.	12
<b>Suggested Books:</b> <ol style="list-style-type: none"> <li>1. सांख्यिकी एवं मूलभूत यंत्रिकरण- डॉ० क्यु० जे० शम्मी, डॉ० रवि उपाध्याय, कैलाश पुस्तक सदन, भोपाल</li> <li>2. पर्यावरण अध्ययन- अंजनी कुमार सिंह, श्रृंखला पब्लिशिंग हाउस, फैजाबाद</li> <li>3. पर्यावरण विज्ञान- के० एल० तिवारी, एस० के० जाधव, आई० के० इंटरनेशनल पब्लिशिंग हाउस प्रा० लि०</li> <li>4. पर्यावरण एवं पारिस्थितिकी- आर० राजगोपालन, ऑक्सफोर्ड यूनिवर्सिटी प्रेस</li> </ol>
