JANANAYAK CHANDRASHEKHAR UNIVERSITY, BALLIA

Faculty of Agriculture

Courses for B.Sc. (Hons.)-Agriculture Degree

(As per ICAR Vth Dean Committee Recommendation)

EXECUTIVE SUMMARY

The Jananayak Chandrashekhar University, Ballia (JNCU, Ballia) is a UP State University established in 2016 under the rule of UP State Universities Act, 1974 and recognized by the University Grant Commission, New Delhi. Faculty of Agriculture is one of the most important faculty under the University. A few government aided College/Private College impart agricultural education affiliated by the University.

It is a well known fact that the Indian Council of Agricultural Research (ICAR) is the apex body for coordinating, guiding and managing the agricultural education and research in the whole country with association of the Education Division. The Education Division ICAR, which is an autonomous organization of the country, functions under the Department of Agricultural Research and Education, Ministry of Agriculture and Famers’ Welfare, Govt. of India. Besides agricultural education, ICAR has responsibility for national agricultural system in the entire country.

The Indian Council of Agriculture Research (ICAR) has responsibility with 101 Institutes, 73 Agricultural Universities and few Colleges including agriculture as subjects spread across the country. ICAR is the apex body for co-coordinating, guiding and managing research and education in agriculture in the entire development, coordination and quality assurance in higher agricultural education in the country and, thus, strives for maintaining and upgrading quality assurance in higher agricultural education, research and transfer of agricultural technology to farmers’. The ICAR-Agricultural Universities (AUs) System comprising State Agricultural Universities (SAUs), Deemed to be Universities, quality assurance in higher agricultural education in the country have been achieved though policy support, accreditation, framing of minimum standards for higher agricultural education, academic regulation, personnel policies, review of course curricula and delivery systems, development support for creating/strengthening infrastructure and facilities, improvement of faculty competence and admission of students through All India Competitions/University level competitions. The most important step for quality improvement of education, the Indian Council of Agricultural Research has been periodically appointing Deans Committees for revision of course curriculum. In the series, Fifth Deans Committee was constituted and given terms of reference considering contemporary challenges for employability of passing out graduates and to adopt a holistic approach for quality assurance in agricultural education.
Considering the fact that the report of the committee needs to be widely accepted, a bottom up approach in respect of curriculum development has been undertaken. To achieve this, inputs from different stakeholders of agricultural education have been obtained at different levels. The committee first deliberated on the skills which graduates must done, to design course curriculum. The suggestions received from all the disciplines of agriculture faculties were reviewed by the Committee. The Committee has tried to make sure that the report represents a national consensus in respect of various issues that have been flagged to the Committee. The course curricula have been restructured to reorient course curricula to develop much needed skills and entrepreneurial mind-set among the graduates to take up self employment, contribute to enhanced rural livelihood and food security, sustainability of agriculture and be propeller for agriculture transformation. the major recommendations are as listed below:

NEW INITIATIVES PROPOSED BY FIFTH DEANS’ COMMITTEE

I. **Student READY (Rural and Entrepreneurship Awareness Development Yojana)**
   In compliance with the Student READY programme launched by the Hon’ble Prime Minister of India on 25th July, 2015, the five components are proposed for conducting one year program in all the UG disciplines.
   To reorient graduates of Agriculture and allied subjects for ensuring by assuring employability and develop entrepreneurs for emerging knowledge intensive agriculture the component envisages the introduction of the program in all the Agricultural Universities. Agricultural colleges as an essential prerequisite for the award of degree to ensure hands on experience and practical training. Considering the variation in different streams of agricultural education and feasibility, the Committee proposes to include following components, which are interactive and are conceptualized for building skills in project development and execution, decision-making, individual and team coordination, approach to problem solving, accounting, quality control, marketing and resolving conflicts, etc. with end to end approach in Student READY program.

   i. Experiential Learning/Hands on Training -24 weeks
   ii. Skill Development Training -24 weeks
   iii. Rural Agriculture work Experience -10 weeks
   iv. In Plant Training/Industrial attachment -10 weeks
   v. Student Projects -10 weeks

   The students will be required to have any three of the five components listed above depending on the requirement of their graduate education but it should be implemented for the complete year, so that their education up to level of III year may get right information in IV year and finally they should attend right stage of entrepreneurship.

II. **Introduction of common courses in all agriculture disciplines**
   The Fifth deans Committee is of the opinion that some of the courses like Environmental Studies and Disaster Management, Communication Skills and Personality Development,
Information and Communication Technology, Entrepreneurship Development and Business Management, Agri-Informatics and Economics and Marketing need to be taught in all the undergraduate programmes of agricultural sciences, as these are must for personality development and to deal with the unforeseen circumstances.

III. Introduction of new degree programs
Since Biotechnology has become an important subject in the field of agricultural sciences, the Committee has recommended introduction of B.Tech. (Biotechnology) course in SAUs. Similarly, Sericulture being an important traditional subject the Committee endorses its inclusion as one of the disciplines in agricultural sciences.

It has been observed that the degree in Home Sciences has been losing its importance in the recent past particularly in terms of limited employability. The Committee has recommended rechristening the discipline of Home Science to Community Science and introducing one more new course in Food Nutrition and Dietetics under the umbrella of Home Sciences along with B.Sc. in Community Science.

IV. Development of DPRs for establishment of colleges
The Deans Committees have been some minimum standards/requirements of the colleges. Fifth Deans Committee has developed a comprehensive Detailed Project Report (DPR) for establishing a college for each discipline.

V. Holistic distribution of courses
The Committee has distributed the courses in a systematic way so as to teach basic courses first followed by principles and finally skill development it is planned to keep courses related to basic fundamentals in first year, theory/practical’s and principles with present state of Art of Technology in second year, modem and frontier area of education in third year and Student READY programme of one year in final year.

VI. Declaring degrees in Agricultural Sciences as professional
Indian council of Agricultural Research constituted a Committee to Review Essential Qualifications and Degree Nomenclature of various programmes running in Agricultural Universities under the chairmanship of Dr R.B. Lal. This Committee has recommended considering degree in agriculture as professional. The Fifth Deans Committee endorses this view and recommends declaring all degrees in agricultural sciences as professional, like veterinary and Animal Science which include undergraduate in:

1. Agriculture
2. Agriculture Engineering
3. Biotechnology
4. Dairy Technology
5. Fisheries
6. Food Technology
7. Forestry
8. Home Science (Community Science)
9. Horticulture
10. Sericulture
The Jannayak Chandrashekhar University and its affiliated colleges are concerned for the course Agriculture only now a day.

VII. Making implementation of recommendations of Deans Committee mandatory
A lot of efforts are made to improve the quality or agricultural education to make it internationally competitive. Implementations of the recommendations of the Fifth Deans Committee to be made mandatory for accreditation of academic programmes and academic institutions by the National Agricultural Education Accreditation Board (NAEB).

ACADAMIC REGULATIONS

UNDER-GRADUATE PROGRAMME (According to recommendation of Fifth (V) Deans’ Committee report)

1. **Degree Nomenclature:** B.Sc. (Hons.) Agriculture, B.Sc. (Hons.) Forestry and B.Sc. (Hons.) Horticulture
2. **System of Education:** Formal education with semester system
3. **Program Duration**
   - Minimum: 8 Semesters (4 academic years)
   - Maximum: 14 Semesters (7 academic years)
4. **Minimum eligibility requirement for admission:** Pass in 10+2 examination (Agriculture or Science-Mathematics/Biology group)
5. **Mode of Admission:** Entrance examination at 10+2
6. **Reservation of seats:** Reservation of seats shall be governed by the rules of State government. 25% ICAR seats to be filled through ICAR entrance examination, if ICAR provides students otherwise the seats are filled as per state govt. rule.
7. **Semester Duration:** The minimum duration of 110 working days, consisting of 95 instructional day and 15 examination days.
8. **Credit Definition:** The University adopted the semester based course work and evaluation in the year 1976. One credit is defined as the lecture of 50 minutes (one period) duration or minimum of two-periods (100 minutes) practical/tutorial work per credit are required. However, for many courses where field work is required, one credit requires 3 periods of field work per week.
9. **Medium of Instruction:** English and Hindi both.
10. **Attendance:** 80 per cent. (Relaxation in minimum attendance requirement should be given only in the case of indoor hospitalization).

**RECORD OF CLASS ATTENDANCE:** Each Instructor shall maintain a record of the student’s attendance in each course taught by him in each semester.

**MINIMUM CLASS ATTENDANCE:** Each student shall be regular in attending classes and shall be required to have a minimum of 80% attendance in each course in each semester, failing
which he/she shall not be awarded grade in that course, unless withdrawal from the course is permitted.

The percentage of attendance of a student in course in a semester shall be computed on the basis of the total number of lectures, practical’s and tutorials attended by him/her and those actually held between the date of commencement of instruction and the date of closing instruction, irrespective of the date of his/her registration and/or the duration of leave duly granted to him/her.

The Dean, may on the recommendation of the instructor/advisor concerned, though the Head of the Department, condone shortage in attendance up to 5% in a course (s) in exceptional circumstances and allow students with an attendance of 75% or more to appear at the final examination. However, on the recommendation of the Dean, the Vice Chancellor may grant a condonation to the extent of 5% and allow students with an attendance of 70% or more to appear at the final examination. In a very exceptional case, if a student fails to secure even 70% attendance, his case can be referred to the Academic Council through Dean for condonation to the extent of further 5% and allow students with an attendance of 65% or more.

NOTE 1:- In computation of percentage of attendance, fractions of 0.5 or above shall be counted as 1.

NOTE 2:- If student is called upon to repeat a course but/she has already put in required attendance in that course on a previous occasion, above requirements of attendance will not apply in his/her case.

NOTE 3:- Whenever students resort to mass absence from classes, a fine of Rs. 15.00/student/day may be levied from all such students. All such students will have to pay this fine before the final examination of the next semester and failure to do so shall render them liable to be debarred from appearing in the examination.

11. Course Curriculum and minimum credits requirement: The ICAR Model Course Curriculum and Syllabus has been followed to meet regional requirements. The minimum credit requirement for the graduate degree should be 183 credits for Math/Bio and 184 credits for Agriculture including non-gradal and remedial courses.

12. Advisement:

(a) Student freshly admitted as well as continuing students shall present themselves in the beginning of each semester on dates notified by the Registrar for advisement and shall be assigned in groups to staff. Advisors/course instructors are nominated by the Dean Agriculture/Principal.

(b) The advisor shall help the UG student in planning the programme of their studies and the choice of courses. He shall also guide the student in determining the credit load, which he can safely and conveniently carry in each semester and shall advise him regarding adding of or withdrawal from the course during a semester. Each Advisor shall maintain a close
contact with his student and keep himself informed of their progress. Problem cases needing special measures shall bring to the notice of the Dean by the Advisor.

13. **Registration**: Following advisement as prescribed above, registration of candidates selected for admission and also of continuing students shall be completed on schedule date(s) notified earlier by Registrar for each semester.

**Mode of Registration**: Registration shall consist of the following steps:

1. Payment of the University fee and other dues.
2. Enrolment of the students in various courses with individual instructors at particular place, date and time.

(i) **Registration of fresh students**: Registration for the first Semester of the year of a degree programme is part of admission procedure and shall be governed by the admission rules. Admission of new students so fallen vacant shall be offered to the candidates in the waiting list.

(ii) **Registration of continuing students**: Registration of continuing students in the subsequent semesters shall be held in a similar way on the date time notified by the Register/Principal

(iii) **Late registration**: A continuing student, who does not register on the day of registration, shall be required to pay a prescribed the registration fee for the first day and further prescribed fee for subsequent two days.

**Note**: If under special circumstances, a student is unable to present him/self herself for registration, he/she may, with the prior permission of the Principal permitted to deposit his/her fee by the prescribed date through his/her representative. However, he/she should present himself/herself for registration within a period of 10 days from the initial date of the registration on payment of a prescribed late fee failing which he/she will not be allowed registration in that semester.

(iv) **Registration necessary for award of degree**: In case, a student studies a course without registration in the prescribed manner, he/she will liable to be summarily dropped from the University.

14. **Examination and Evaluation System**

**Examination**

- Theory (75 % by Internal or external examiner)
- Practical (25 % by Internal or external examiner))
- **Courses with Theory and Practical**
  Practical examination-25 % (Including assignment 5% + 5% Attendance). Practical examination will be conducted by internal or external examiner as per the instruction of University.
- **Courses with only Theory**- No Practical examination but 75 % theory and 25 % assignment (assignment evaluation by internal examiner).
Courses with only Practical: (100%) Examination will be conducted by Internal or external examiner as per the instruction of the University.

- Paper to be set by external/Internal: Incharge of the department shall ensure the coverage of syllabus. If needed moderation can be done.
- Evaluation to be done external/internal examiner. Syllabus of the concerned course shall be sent to the external examiner, who shall prepare the question papers. For practical, it is recommended that examination shall be conducted by course instructor(s) nominated by University/Principal of the College.

OGPA = $\sum_{\text{Total Pints Scored (after excluding failure points)}} \frac{\text{Course Credits}}{\% \text{ of Marks}} = \sum_{\text{OGPA}} \times \frac{100}{10}$

**FINAL EXAMINATION:** Final examinations shall be held on the dates, which shall be notified by the Registrar either in the University calendar or at the beginning of each academic year or otherwise. If a student fails to appear in the final examination of semester, he will not be allowed for registration in the next semester. Such student will repeat the semester when it runs. However, this rule is not applicable for that student who has been permitted for makeup examination by the competent authority.

**PREPARATION OF EXAMINATION SCHEDULE:** The Mid-term and Final examination schedule shall be prepared and notified by the Registrar ten days before the commencement of the examination.

**SEATING ARRANGEMENT:** The Dean/Principal of the college shall conduct the examination and the respective centre superintendents shall make the seating arrangements.

**SUPPLY OF EXAMINATION MATERIAL**

1. Examination materials such as answer books twine, drawing papers, log tables, graph papers etc. will be supplied by the Registrar/Centre Superintendent.
2. Every student shall be required to bring examination materials such as set squares, scales, pen, pencils, high liters etc. as he shall not be permitted to borrow any of these materials from fellow students in the examination hall.

**APPEARING IN THE FINAL EXAMINATION:** Candidates coming late by more than 30 minutes in the Final Semester examination shall not be allowed to appear in that examination and no examinee shall be allowed to go out of the examination hall for the first 30 minutes.

**MAKE-UP EXAMINATION:** In case a student is seriously ill either in the campus and produces a medical certificate from CMO of district has or is hospitalized elsewhere and is unable to attend his examinations, the Registrar may permit him to appear in more than one make-up examination but not more than two make-up examinations during any one Semester.

**MID TERM AND FINAL EXAMINATION:** Normally no make-up examination shall be permissible in lieu of the missed mid-term or final examination except as permitted by Dean/Registrar of the university.

(i) If a student fails to appear in any mid-term examination for reasons beyond his/her control, he/she must file an application on the day on which the examination is missed.

(ii) As far as possible, make-up examination shall be discouraged, only in extremely genuine cases like hospitalization; a student can be permitted by the Dean/Registrar to appear at the make-up examination in the mid-term examinations.
(iii) Dean/Registrar is empowered to allow a student for make-up only in mid-term examination, if he/she fulfills the requirements.

**Note:** The Student can be permitted to appear at the make-up examination only in extremely genuine cases, on the following grounds:

(a) If he/she is seriously ill.
(b) If he/she has taken leave on account of the death of his mother, brother, sister, spouse, child or grandparent.
(c) Any other genuine cause with which the Dean/Registrar is satisfied. Such cases should be reported to the Registrar.
(d) Only one make-up examination will be permissible during a semester but not more than two.

1. The application for make-up examination must be supported by medical certificate either from the CMO or from the hospital concerned and should be routed through advisor/Principal.
2. No application for make-up examination shall be considered if received after one week from the expiry of the last date of mid-term examination.
3. Make-up examination must be completed within one week from the date of grant of permission by the Dean. It will be the responsibility of the student to get in touch with his/her teacher and have a date fixed for the make-up examination after necessary permission is granted.
4. Result of make-up examination will count along with the previous performance of the student during the term for awarding the final grade in course concerned.

**Restriction for students going out on educational tours and extra-curricular activities:** The educational tours and extra curricula activities may be organized in such a way not to disturb the academic programme particularly the final examination. As far as possible such programmes should be organized during semester break.

**15. SCRUTINY:**

1. Scrutiny means totaling of marks and evaluation of questions left unmarked.
2. If any student desires scrutiny in any course, he shall be permitted to do so with a prescribed scrutiny fee per course.
3. He/she shall have to file an application on the prescribed form which can be obtained from the office of the Registrar within a period of 7 days from the date of registration in the semester; failing which no such applications shall be entertained.
4. After having the approval of the Registrar, he/she will present the form to the instructor concerned.
5. The answer book shall be scrutinized by the instructor concerned in collaboration with Head of the Department/Dean, Agriculture.
6. The result of scrutiny shall be intimated to the Registrar as soon as possible but in no case later those three weeks from the date of registration.
7. The result of the scrutiny shall be final.

**CHANGE OF GRADE AS A RESULT OF SCRUTINY:** After the grade has been revised as a result of scrutiny, the instructor will send the grade through his/her Incharge of the Department to the Registrar/the Dean.

**16. USE OF UNFAIR MEANS (UFM):**

(1) The terms “use of unfair means in the examination” or “attempt to use unfair means in the examination” shall denote the items prescribed by the Academic Council, through its resolution, from time to time. The following items are included in this category-

(a) Possession of any books, notes, chits, or such other material and also any notes or signs written on any part of the body, furniture or any other material pertaining to the subject matter of the examination in the examination hall during the examination hours.

(b) Talking, whispering or signaling in any form in the examination hall or outside the examination hall during the examination hours.

(c) Copying or allowing to copy.

(d) Any other activity which may give undue advantage in the examination to any student.

(e) Any attempt to use any other means, which in the opinion of the Superintendent of examination may be considered to be unfair.

(2) **Unfair means in examination:** The Dean/Principal of the college in which the student is registered shall be responsible for dealing with all the cases of use of unfair means in the semester test and examinations. In this matter, a Committee consisting of the Dean and two professors/Instructors of the College shall assist the Dean. This Committee shall be constituted by Vice Chancellor every year. The committee shall take appropriate action after effecting full opportunity to the student for his defense and the penalty will be as indicated below.

(a) A student if found using unfair during mid-term examination, he will be awarded zero in mid-term examination.

(b) A student found unfair means during the final examination shall be punished as under-

(i) If the material found with the student is related with the course and the student has not used it, he would be awarded ‘F’ grade in that course.

(ii) If the student has used the material found with the student he will be awarded ‘F’ grade in all the courses in the semester.

(iii) A student found to appear in the examination in place of another student would be treated under unfair means. Such student will be summarily expelled from the University.

(c) If a student repeats the offence more than twice, during a particular degree programme, he will be disqualified for being a student in this University and shall be immediately removed from College.

(3) The instructor/invigilators concerned shall report to the Dean/Principal through the Head of the Department/Principal/Superintendent of Examinations on the day of occurrence of cases of unfair means with full details of the evidence and/ or exhibits. An explanation of the student concerned, if possible, shall also be submitted.
17. **REPETITIONS OF COURSES:**
   (a) If a student secures ‘F’ grade, he shall be repeat the course whenever the university offers it.
   (b) In case a student obtains ‘F’ grade in a course and repeats it, the grade secured by the student on repeating the course shall be reflected in the grade report.
   (c) If a student secures ‘F’ grade a course and fulfills attendance requirement, he may be permitted by Dean to take re-examination of that course after six month in the semester in which the said course is being offered. However, the student shall submit his application for permission within a month from the date of registration with prescribed fee.
   (d) Just after announcement of results, the Register will communicate the list of students, who have obtained ‘F’ the University is offering grade in the course. The Dean will notify that such students have to appear in first offered opportunity by the University. Even after notification of a student fails to appear in the first offered opportunity he/she will lose one chance of repeat.

**STUDENTS’ DESCPLINE and HOSTEL REGULATIONS**

(A) **REGULATIONS FOR STUDENTS’ DISCIPLINE:**
1. Every student shall assume a sense of responsibility to the ordinary rules of good conduct, to protect private and public property and to make most effective use of his/her time in securing education at the University.
2. No custom or regulation which restricts or creates hindrance in making best use of students’ time and talent towards University education, will be allowed to prevail.
3. The students are required to be regular and punctual at lectures and practical in each subject and will be granted leave at their own risk, as they are themselves responsible for completing the prescribed attendance in order to qualify for the University examinations. However, if no leave application in received and the student remains absent for ten days or more continuously from class/admission/registration may be cancelled. The Head/In-charge of Department shall report such cases to Dean/Principal and registrar of the University.
4. Student shall not be eligible for appearing at the University examinations unless he/she paid all the outstanding dues.
5. Person(s) cannot be invited to address or participating in any meetings within the University or hostel premises without the written permission of the Dean/DSW/Principal of the college.
6. If any collection of money for any fund or function shall be made without permission. The organizing committee concerned shall maintain proper account of money collected and the same shall be submitted to the Dean of Faculty/Principal 15 days after the function is over.
7. No student(s) shall be allowed to associate with or to attend any type of illegal activity and/or unauthorized meeting or society outside the campus or for collection of money for any such fund or functions without obtaining permission from Dean of Faculty/D.S.W./Principal.
8. Students are strictly forbidden to resort to or instigate a strike, hunger strike, picketing, demonstrations including political demonstration, unlawful assemblies’ unauthorized processions, shouting of objectionable slogans, carrying of placards within the campus, hostels or at residences of officers/staffs.

9. Sticking of posters, distribution of handbills either within or outside the University/College campus is forbidden unless the competent authority has granted permission for students’ union election.

10. It is compulsory for every student to obtain his identity card in the manner prescribed by the University/College. All students shall get their residential address recorded in the office of the Dean/College and shall notify any change of address, which may take place subsequent to the registration.

11. When a student has been found guilty of grave misconduct of persistent idleness or of habitual breach of discipline within or outside the premises of the University, the Vice-chancellor on the advice of discipline committee may, according to the nature and gravity of the offence, summarily cancel the registration of a student during a semester/session and may not permit the student to register for any number of subsequent semesters/sessions.

12. Punishment awarded to students shall invariably be recorded in their personnel record for future reference and will be taken into consideration, if necessary, while awarding certificate of conduct on leaving the University.

13. Students are expected to maintain a high standard of discipline on the campus.

The following are the detailed outlines of student’s indiscipline:

- Disregard of college/hostel rules, orders & notices.
- Disregard of orders and instructions of the member of college staff.
- Noisy, boisterous, disorderly and obnoxious behavior with fellow students and staffs.
- Ragging of junior students, which are strictly banned.
- Irregular attendance and unauthorized absence from classes and hostels.
- Lack of punctuality in attendance and in payment of college dues.
- Recourse to unfair means in tests and examinations.
- Recourse to false or fraudulent statements or acts.
- Keeping, carrying and supplying of any fire arms, lethal weapons, knife with a blade of more than 4” in the room or outside.
- Keeping, using, or supplying intoxicants in any form.
- Gambling in any form.
- Demonstration in any form including processions and meeting, except student union election.
- Strike or hunger strike.
- Boycotting of a University function, programme or activity.
- Abusing.
- Recourse to violence, intimidation, riots.
14. Students(s) who has/have committed any cat or indiscipline is liable to any one or more of the following punishments.

- Warning.
- Reduction/Cancellation of scholarship/stipend/fellowship.
- Fine.
- Recovery in part of full of losses or damages to the college property or property of others caused by the students.
- Suspension from availing any of the college amenities and services or from class.
- Removal, rustication or expulsion from the college, hostel or university.

15. Any student who violates any regulation or otherwise indulges in any act of indiscipline as defined may be fined up to Rs. 100/- by the warden of the hostel if the warden is satisfied that the fine is adequate, punishment for the act for indiscipline.

16. Cases of indiscipline, which in the opinion of the proctors of college/principal of the college are so serious that a fine of Rs.100/- or less would not be sufficient, punishment shall be referred by the wardens to Dean/D.S.W. principal for taking disciplinary action against the students. Board or a committee proctors consisting of all wardens proctors of the college may fine up to Rs.1500/- and this shall be noted on the students’ permanent record card but shall not go necessarily on the character certificate. In addition, the student may also be placed on conduct probation. This will include and official warning to student that one more incident of indiscipline might lead to the dismissal of the student from the University. Any student during this period when he/she is on conduct probation will not be entitled for any financial aid and shall not represent university/college or anywhere.

17. On the basis of complaint(s) received against any student, if the Dean/principal is convinced, pending enquiry and final orders, the alleged/involved student(S) may also be placed on conduct probation.

18. Cases of more serious indiscipline shall be forwarded to the Vice-chancellor who on the recommendation of the disciplinary committee shall award adequate punishment(s).

19. Students found directly or indirectly involved in ragging of newly admitted students inside or outside the campus will summarily be expelled from the college/university.
20. For indiscipline on playground, games president may fine students(s) up to Rs. 100/- each and/or debar a student from game(s) for up to two semesters/one session. For debarring, approval of Dean Students Welfare/Principal will have to be obtained.

(B) READMISSION BY SUSPENSION OF PUNISHMENT SHALL INVARIA�LLY BE SUBJECT TO THE FOLLOWING CONDITIONS:

1. The student concerned will be re-admitted not as a matter of right but only on compassionate ground, on the submission of an unconditional apology
2. He/she will remain on conduct probation during the remaining period of his/her stay in the University.
3. He/she will furnish a bond of good behavior as prescribed, duly countersigned by his/her parent/guardian, which should remain operative for the entire period of his stay in the college or university.
4. He/she will not apply nor will be entitled to admission to any new degree programme in the University/College.
5. If the student concerned has been permanently dismissed, he/she will be entitled to apply for relief under this regulation only after the expiry of two semester/one session from the date of orders of punishment, but in no case will be entitled to readmission before the expiry of less than four semesters/two sessions from the effective date of punishment.
6. No Student shall be eligible for seeking relief under this regulation unless he has completed at least two semesters/one session satisfactorily in college/University prior to being awarded the punishment of permanent dismissal.
7. No student shall be eligible to seek or be granted relief under the regulation if he/she commits any act of indiscipline in the college/university campus or misbehaves with any officer or teacher of the College/University within campus or outside during the period laid down in clause(5) above:

(C) HOSTEL RULES:

1. Allotment of hostel rooms to the students will be entirely the discretion of the wardens. The warden may change the allotment as and when they think necessary to do so. No change from one room to another or the partnership shall be allowed except under special circumstances by prior written approval of the warden.
2. After a student is admitted to the College/University, it is compulsory for him to reside in the hostel maintained or recognized by the University except those living either with their parents or guardians within or outside University campus. Such students who do not want to reside in the hostel from the D.S.W./Dean must obtain written permission. On being admitted to the University, a student has to deposit a sum of Rs. 200/- payable in two installments or Rs. 100/- each to be paid at the time of registration of first two semesters besides other dues, which shall be refundable to him/her when he/she vacates the hostel after clearing the dues.
3. The Dean/D.S.W./Warden of the hostels reserve the right to refuse admission in the hostels without assigning any reason to a student who’s living in the hostel is considered prejudicial to the general discipline in the hostels.
4. The warden or any other official of the University competent or deputed shall open all the rooms in the hostel for inspection for the purpose at any time.

5. When required by the wardens for specific reasons, the student residents shall vacate the room temporarily or otherwise. In case of refusal, the wardens shall have power break open the room and get the room vacated.

6. The students must be present in their rooms at the time of roll call, which be taken every night between 9.30 and 10.00 P.M. by the prefects who will be appointed by the wardens. Any student found absent without permission is liable to fine up to 5/- per night of absence and/or disciplinary action. The cashier would realize the fine as fees on the report of the warden. Guardians of the students or the respective State Governments, as the case may be, will be informed. If unauthorized absence exceeded 15 days, the allotment of the room will be cancelled and hostel room rend will be forfeited.

7. When the warden finds a student frequently out during night without permission, he/she will, apart from imposing the usual fines, issue a warning to him/her if the warning has no effect on the students, Dean/D.S.W. on the recommendation of the warden may expel the student from the hostel or may take such other disciplinary action as he deems proper.

8. Before leaving the hostel for the night or for the holidays excluding semester breaks and summer vacations, the student must obtain prior permission of the warden on prescribed hostel permit slips.

9. No student shall quarrel or misbehave with any fellow student or employee of the hostel including dhobi, barber, chowkidar, sweeper, servant, maintenance staff, mess worker and cook etc. Any misbehavior on the part of the employees or fellow students shall be brought to the notice of the warden and the concerned student is liable to disciplinary action.

10. No meeting shall be held within the premises of the hostel without the prior permission of the warden. Disciplinary action will be taken against students who organize or attend such unauthorized meetings, except student’s union election, outside of hostel.

11. If a student defaces or causes damage to the building, furniture of fitting, the cost or repair or replacement shall be recovered from him.

12. Friends and relatives of the students may visit them in the hostels during the daytime only. Non-authorized person is allowed to stay at night in the hostel after 10pm. If, however, parents/guardians or other guests of the students have to stay, the students must take permission from D.S.W./Dean on the recommendation of the wardens. This facility will be available in Teacher’s / Farmer’s guest House University / College accommodation. If any for a period of maximum of three days only.

13. No guests of opposite sex are allowed to stay or visit the hostel at any time under any circumstances.

14. Students shall not shift fittings assigned to the rooms. When leaving for vacation, these must be handed over to the storekeeper or his/her representative. During the period of allotment of room, the student will be responsible for all property in the room.

15. No fire combustible articles, arms or lethal weapons are allowed to be kept in the hostel.
16. No resident student shall keep in his possession or use intoxicating drugs or liquor of any kind. Gambling or playing cards in any form in the hostel in strictly prohibited.

17. Students are not allowed to have their own recreational appliances viz. radio, transistor, tape recorder/player, T.V. etc.

18. Students falling sick should inform the Medical Officer/any officer of the university/college under intimation to the warden.

19. Resident students would observe cleanliness around their surroundings and should keep their rooms neat and tidy.

20. Watchman/security guard of hostels watch and wards of the University/College property. No student in any circumstances should ask the Watchman/security guard to do any other work.

21. Students shall have to take care of their belongings themselves and are advised not keep any costly items with them in the hostel/any officer of the university/college.

22. No electric point should be left on while locking the room at any time.

23. Students are not permitted to have electric heaters in their rooms. In case any student found in using electric heaters, a penalty of Rs. 1000/-is fined from the concerned student.

24. Cooking in any form is not allowed in the hostel room.

RAWE Component –II
Agro Industrial Attachment
- Students shall be placed in Agro-and Cottage industries and Commodities Boards for 03 weeks
- Industries include Seed/Sapling production, Pesticides-insecticides, Postharvest-processing-value addition, Agri-finance institutions, etc.
Activities and Tasks during Agro-Industrial Attachment Programme

- Acquaintance with industry and staff
- Study of structure, functioning, objective and mandates of the industry
- Study of various processing units and hands-on trainings under supervision of industry staff
- Ethics of industry
- Employment generated by the industry
- Contribution of the industry promoting environment
- Learning business network including outlets of the industry
- Skill development in all crucial tasks of the industry
- Documentation of the activities and task performed by the students
- Performance evaluation, appraisal and ranking of students

Modules for Skill Development and Entrepreneurship: A student has to register 20 credits opting for two modules of (0+10) credits each (total 20 credits) from the package of modules in the VIII semester.

**Department-wise summary of credit hours**

**S.N. Group (Department)**

1. **Agronomy**
   - **Credits**: 20 (10+10)
2. **Genetics and Plant Breeding**
   - **Credits**: 22 (13+9)
3. **Agricultural Chemistry and Soil Science**
   - **Credits**: 21 (13+8)
4. **Agricultural Economics and Statistics**
   - **Credits**: 21 (15+6)
5. **Plant Pathology**
   - **Credits**: 13 (9+4)
6. **Agricultural Entomology**
   - **Credits**: 16 (12+4)
7. **Horticulture**
   - **Credits**: 19 (11+8)
8. **Agricultural Engineering**
   - **Credits**: 10 (6+4)
9. **Agriculture Extension**
   - **Credits**: 14 (9+5)
10. **Soil Conservation**
    - **Credits**: 10 (6+4)
11. **Animal Husbandry and Dairying**
    - **Credits**: 18 (12+6)

**NSS/NCC/Physical Education & Yoga Practices (Non Gradial)**

- **Credits**: 2 (0+2)

**Educational Tour (Non Gradial)**

- **Credits**: 2 (0+2)

**Total 184 + 4 (Non Gradial)**

**RAWE-**

**ELP**

**Grand Total 184+20+20=224**

**Elective Courses:** A student can select three elective courses out of the following and offer during 4th, 5th and 6th semesters.

I. AGRONOMY

1. Fundamentals of Agronomy

Theory

Agronomy and its scope, seeds and sowing, tillage and tilth, crop density and geometry, Crop nutrition, manures and fertilizers, nutrient use efficiency, water resources, soil-plant-water relationship, crop water requirement, water use efficiency, irrigation- scheduling criteria and methods, quality of irrigation water logging.

Weeds-importance, classification, crop weed competition, concepts of weed management principles and methods, herbicides- classification, selectivity and resistance, allelopathy.

Growth and development of crops, factors affecting growth and development, plant ideotypes, crop rotation and its principles, adaptation and distribution of crops, crop management technologies in problematic areas, harvesting and threshing of crops.

Practical

Identification of crops, seeds, fertilizers, pesticides and tillage implements, study of agri-climatic zones of India, Identification of weeds in crops, Methods of herbicide and fertilizer application, Study of yield contributing characters and yield estimation, Seed germination and viability test, Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement, Use of tillage implements-reversible plough, one way plough, harrow, leveler, seed drill.

2. Crop Production Technology-I (Kharif Crops)

Theory

Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif crops. Cereals – rice, maize, sorghum, pearl millet and finger millet, pulses-pigeonpea, mungbean and urdbean; oilseeds- groundnut, and soybean; fibre crops- cotton & jute; forage crops- sorghum, cowpea, cluster bean and napier.

Practical

Rice nursery preparation, transplanting of rice, sowing of soybean, pigeonpea and mungbean, maize, groundnut and cotton, effect of seed size on germination and seedling vigour of kharif season crops, effect of sowing depth on germination of kharif crops, identification of weeds in kharif season crops, top dressing and foliar feeding of nutrients, study of yield contributing characters and yield calculation of kharif season crops, study of crop varieties and important agronomic experiments at experimental farm. Study of forage experiments, morphological description of kharif season crops, visit to research centres of related crops.
3. Crop Production Technology-II (Rabi crops) 2(1+1) MM:75
Theory
Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Rabi crops; cereals – wheat and barley, pulses – chickpea, lentil, peas, oilseeds – rapeseed, mustard and sunflower; sugar crops – sugarcane; medicinal and aromatic crops – mentha, lemon grass and citronella, Forage crops – berseem, lucerne and oat.

Practical MM:25
Sowing methods of wheat and sugarcane, identification of weeds in rabi season crops, study of morphological characteristics of rabi crops, study of yield contributing characters of rabi season crops, yield and juice quality analysis of sugarcane, study of important agronomic experiments of rabi crops at experimental farms. Study of rabi forage experiments, oil extraction of medicinal crops, visit to research stations of related crops.

4. Water Management for Crops 2(1+1) MM:75
Theory
Water management: definition, scope, area and objective. Water resources and irrigation development in India; soil plant water relationship; soil moisture constants, water and irrigation requirement, irrigation scheduling, irrigation methods, irrigation water measurements, irrigation water use efficiency, water productivity, irrigation water quality, water management for different crops – rice, wheat, maize, pulses, oilseeds and sugarcane. Drainage, Characterization of flood prone and wetland area (Suraha, Dahtal etc.)

Practical
Soil moisture measurements, determination of field capacity and permanent wilting point, measurement of irrigation water, calculation on irrigation water requirement and water use efficiency, water productivity, determination of infiltration rate, cost of determination of drip and sprinkler irrigation system.

5. Farming System and Sustainable Agriculture 2(2+0) MM:75
Theory
Farming System: scope, importance, and concept. Types and systems of farming system and factors affecting types of farming, Farming system components and their maintenance, Cropping system and pattern, multiple cropping system, Efficient cropping system and their revaluation, Allied enterprises and their importance, Tools for determining production and efficiencies in cropping and farming system; Sustainable agriculture: problems and its impact on agriculture, indicators of sustainability, adaptation and mitigation, conservation agriculture strategies in agriculture, HEIA, LEIA and LEISA and its techniques for sustainability, Integrated farming system: historical background, objectives and characteristics, components of IFS and its advantages, Site specific development of IFS model for different agro-climatic zones, resource use efficiency and optimization techniques, Resource cycling and flow of energy in different
farmingsystem, farming system and environment, Visi of IFS model in different agro-climatic zones of nearby states University/ institutes and farmers field.

6. Practical Crop Production-I (Kharif Crops) 2(0+2) MM:100

Practical
Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests diseases of crops, harvesting, threshing, drying winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balancesheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

7. Practical Crop Production-II (Rabi Crops) 2(0+2) MM:100

Practical
Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests diseases of crops, harvesting, threshing, drying winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balancesheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

8. Principles of Organic Farming and Precision Farming 2(1+1) MM:75

Theory
Organic farming, principles and its scope in India; Initiatives taken by Government (central/state), NGOs and other organizations for promotion of organic agriculture; Organic ecosystem and their concepts; Organic nutrient resources and its fortification; Restrictions to nutrient use in organic farming; Choice of crops and varieties in organic farming; Fundamentals of insect, pest, disease and weed management under organic mode of production; Operational structure of NPOP; Certification process and standards of organic farming; Processing, leveling, economic considerations and viability, marketing and export potential of organic products. Precision agriculture: concepts and techniques; their issues and concerns for Indian agriculture.

Practical
Visit of organic farms to study the various components and their utilization; Preparation of enrich compost, vermicompost, bio-fertilizers/bio-inoculants and their quality analysis; Indigenous technology knowledge (ITK) for nutrient, insect, pest disease and weed management; Cost of organic production system; Post harvest management; Quality aspect, grading, packaging and handling.

9. Weed Management (2+1) (Elective Course) MM:75
Theory

Practical MM:75

II. GENETICS AND PLANT BREEDING

1. Fundamentals of Crop Physiology and Taxonomy

Theory
Introduction to crop physiology and its importance in Agriculture; Plant cell: an Overview; Diffusion and osmosis; Absorption of water, transpiration and Stomatal physiology; mineral nutrition of Plants: Functions and deficiency symptoms of nutrients, nutrient uptake mechanisms; Photosynthesis: Light and Dark reactions, C3, C4 and CAM plants; Respiration: Glycolysis, TCA cycle and electron transport chain; Plant growth regulators: Physiological roles and agricultural uses, Physiological aspects of growth and development of major crops: Growth analysis, Role of Physiological growth parameters in crop productivity. Study of family monocot-(i)Araceae-Colocasia.(ii)Graminae-Triticam, Hardeum, Oryza, Zea, Pennisetum, Sorghum and family dicot-(i)Leguminosae-Pisum, Cicer, Crotalaria, Cajanus, Arachis(ii)Cucurbitaceae-Luffa, Lagenaria.(iii) Cruciferea- Brassica(iv)Solanceae-Solanum, Nicotiana(v)Euphorbiaceae-Ricinus.(vi)Linaceae-Linum(vii)Pedaliaceae-Sesamum.(viii) Compositae-Carthamus (ix)Tiliaceae-Carchorus (x) Malvaceae- Hibiscus, Gossypium

Practical MM:25
Study of plant cells, structure and distribution of stomata, imbibitions, osmosis, plasmolysis, Measurement of root pressure, rate of transpiration, Separation of photosynthetic pigments through paper chromatography, Rate of transpiration, photosynthesis, respiration, tissue test for mineral nutrients, estimation of relative water content.Plants and flowers description and identification

2. Fundamentals of Genetics

3(2+1) MM:75
Theory

Practical MM:25
Study of microscope. Study of cell structure. Mitosis and Meiosis cell division. Experiments on monohybrid, dihybrid, trihybrid, test cross and back cross. Experiments on epistatic interactions including test cross and back cross, Practice on mitotic and meiotic cell division, Experiments on probability and Chi-square test. Determination of linkage and cross-over analysis (through two point test cross and three point test cross data). Study on sex linked inheritance in Drosophila. Study of models on DNA and RNA structures.

3. Principles of Seed Technology 3(1+2) MM:75
Theory
Seed and seed technology: introduction, definition and importance. Deterioration causes of crop varieties and their control: Maintenance of genetic purity during seed production, seed quality; Definition, Characters of good quality seed, different classes of seed. Foundation and certified seed production of important cereals, pulses, oilseeds, fodder and vegetables. Seed certification, phases of certification, procedure for seed certification, field inspection. Seed Act and Seed Act enforcement. Duty and powers of seed inspector, offences and penalties. Seeds Control Order 1983, Varietal Identification through Grow Out Test and Electrophoresis, Molecular and Biochemical test. Detection of genetically modified crops, Transgene contamination in non-GM crops, GM crops and organic seed production. Seed drying, processing and their steps, Duster, VCU test seed testing for quality assessment, seed treatment, its importance, method of application and seed packing. Seed storage; general principles, stages and factors affecting seed longevity during storage. Measures for pest and disease control during storage. Seed marketing: structure and organization, sales generation activities, promotional media. Factors affecting seed marketing, Role of WTO and OECD in seed marketing. Private and public sectors and their production and marketing strategies.
Practical MM:25

4. Fundamentals of Plant Breeding 3(2+1) MM:75

Theory
Historical development, concept, nature and role of plant breeding, major achievements and future prospects; Genetics in relation to plant breeding, modes of reproduction and apomixes, self-incompatibility and male sterility - genetic consequences, cultivar options. Domestication, Acclimatization and Introduction; Centres of origin/diversity, components of Genetic variation; Heritability and genetic advance; Genetic basis and breeding methods in self-pollinated crops - mass and pure line selection, hybridization techniques and handling of segregating population; Multiline concept. Concepts of population genetics and Hardy-Weinberg Law, Genetic basis and methods of breeding cross-pollinated crops, modes of selection; Population improvement Schemes - Ear to row method, Modified Ear to Row, recurrent selection schemes; Heterosis and inbreeding depression, development of inbred lines and hybrids, composite and synthetic varieties; Breeding methods in asexually propagated crops, clonal selection and hybridization; Maintenance of breeding records and data collection; Wide hybridization and prebreeding; Polyploidy in relation to plant breeding, mutation breeding - methods and uses; Breeding for important biotic and abiotic stresses; Biotechnological tools - DNA markers and marker assisted selection. Participatory plant breeding; Intellectual Property Rights, Patenting, Plant Breeders and Farmer’s Rights.

Practical MM:25

5. Fundamentals of Biotechnology 2(1+1) MM:75

Theory
Concepts and applications of plant biotechnology: Scope, organ culture, embryo culture, cell suspension culture, callus culture, anther culture, pollen culture and ovule culture and their applications; Micro-propagation methods; organogenesis and embryogenesis, Synthetic seeds and their significance; Embryo rescue and its significance; Somatic hybridization and cybrids; Somaclonal variation and its use in crop improvement; cryo-preservation; Introduction to recombinant DNA methods: physical (Gene gun method), chemical (PEG mediated) and Agrobacterium mediated gene transfer methods; Transgenics and its importance in crop improvement; PCR techniques and its applications; RFLP, RAPD, SSR; Marker Assisted Breeding in crop improvement; Biotechnology regulations.

**Practical MM:25**
Composition of various tissue culture media and preparation of stocks solutions for MS nutrient medium. Callus induction from various explants. Micro-propagation, hardening and acclimatization. Demonstration on isolation of DNA. Demonstration of gelelectrophoresis techniques and DNA finger printing.

**6. Crop Improvement – I (Kharif) 2(1+1) MM:75**

**Theory**
Centers of origin, distribution of species, wild relatives in different cereals; pulses; oilseeds; fibres; fodders and cash crops; vegetable and horticultural crops; Plant genetic resources, its utilization and conservation, study of genetics of qualitative and quantitative characters; Important concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops; Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress tolerance and quality (physical, chemical, nutritional); Hybrid seed production technology in Maize, Rice, Sorghum, Pearl millet and Pigeonpea, etc. Ideotype concept and climate resilient crop varieties for future.

**Practical MM:25**
Floral biology, emasculation and hybridization techniques in different crop species; viz., Rice, Jute, Maize, Sorghum, Pearl millet, Ragi, Pigeonpea, Urdbean, Mungbean, Soybean, Groundnut, Sesame, Caster, Cotton, Cowpea, Tobacco, Brinjal, Okra and Cucurbitaceous crops. Maintenance breeding of different kharif crops. Handling of germplasm and segregating populations by different methods like pedigree, bulk and single seed decent methods; Study of field techniques for seed production and hybrid seeds production in Kharif crops; Estimation of heterosis, inbreeding depression and heritability; Layout of field experiments; Study of quality characters, donor parents for different characters; Visit to seed production plots; Visit to AICRP plots of different field crops.

**7. Crop Improvement – II (Rabi) 2(1+1) MM:75**

**Theory**
Centers of origin, distribution of species, wild relatives in different cereals; pulses; oilseeds;
fodder crops and cash crops; vegetable and horticultural crops; Plant genetic resources, its utilization and conservation; study of genetics of qualitative and quantitative characters; Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress tolerance and quality (physical, chemical, nutritional); Hybrid seed production technology of Rabi crops. Ideotype concept and climate resilient crop varieties for future.

**Practical**

Floral biology, emasculation and hybridization techniques in different crop species namely Wheat, Oat, Barley, Chickpea, Lentil, Field pea, Rajma, Horse gram, Rapeseed Mustard, Sunflower, Safflower, Potato, Berseem. Sugarcane, Tomato, Chilli, Onion; Handling of germplasmand segregating populations by different methods like pedigree, bulk and single seed decent methods; Study of field techniques for seed production and hybrid seeds production in Rabi crops; Estimation of heterosis, inbreeding depression and heritability; Layout of field experiments; Study of quality characters, study of donor parents for different characters; Visit to seed productionplots; Visit to AICRP plots of different field crops.

**8. Intellectual Property Rights**

**Theory**

**Assignment**

**9. Commercial Plant Breeding**

**Theory**

Types of crops and modes of plant reproduction. Line development and maintenance breeding in self and cross pollinated crops (A/B/R and two line system) for development of hybrids and seed production. Genetic purity test of commercial hybrids. Advances in hybrid seed production of maize, rice, sorghum, pearl millet, castor, sunflower, cotton pigeon pea, Brassica etc. Quality seed production of vegetable crops under open and protected environment. Alternative strategies
for the development of the line and cultivars: haploid inducer, tissue culture techniques and biotechnological tools. IPR issues in commercial plant breeding: DUS testing and registration of varieties under PPV & FR Act. Variety testing, release and notification systems in India. Principles and techniques of seed production, types of seeds, quality testing in self and cross pollinated crops.

**Practical**

Floral biology in self and cross pollinated species, selfing and crossing techniques. Techniques of seed production in self and cross pollinated crops using A/B/R and two line system. Learning techniques in hybrid seed production using male-sterility in field crops. Understanding the difficulties in hybrid seed production, Tools and techniques for optimizing hybrid seed production. Concept of rouging in seed production plot. Concept of line its multiplication and purification in hybrid seed production. Role of pollinators in hybrid seed production. Hybrid seed production techniques in sorghum, pearl millet, maize, rice, rapeseed-mustard, sunflower, castor, pigeon pea, cotton and vegetable crops. Sampling and analytical procedures for purity testing and detection of spurious seed. Seed drying and storage structure in quality seed management. Screening techniques during seed processing viz., grading and packaging. Visit to public private seed production and processing plants.

**III. AGRICULTURAL CHEMISTRY AND SOIL SCIENCE**

1. **FUNDAMENTALS OF SOIL SCIENCE**

**Theory**

Soil as a natural body, Pedological and edaphological concepts of soil; Soil genesis: soil forming rocks and minerals; weathering, processes and factors of soil formation; Soil Profile, components of soil; Soil physical properties: soil-texture, structure, density and porosity, soil colour, consistence and plasticity; Elementary knowledge of soil taxonomy classification and soils of India; Soil water retention, movement and availability; Soil air, composition, gaseous exchange, problem and plant growth, Soil temperature; source, amount and flow of heat in soil; effect on plant growth, Soil reaction-pH, soil acidity and alkalinity, buffering, effect of pH on nutrient availability; soil colloids- inorganic and organic; silicate clays: constitution and properties; sources of charge; ion exchange, cation exchange capacity, base saturation; soil organic matter: composition, properties and its influence on soil properties; humic substances - nature and properties; soil organisms: macro and micro organisms, their beneficial and harmful effects; Soil pollution - behaviour of pesticides and inorganic contaminants, prevention and mitigation of soil pollution.

**Practical**

2. Manures, Fertilizers and Soil Fertility Management 3(2+1) MM:75

Theory

Practical MM:25

3. Fundamentals of Plant Biochemistry 3(2+1) MM:75

Theory

Practical MM:25

4. Agricultural Microbiology 2(1+1) MM:75

Theory

Practical MM:25

5. Problematic Soils and their Management 2(1+1) MM:75

Theory

Practical MM:25
Analysis for soil health, Measurement of Soil salinity, alkalanity, acidity, lime requirement, ESP, SAR, Gypsum requirement, analysis of quality of irrigation water. Identification of tree, crops and grasses for problematic soil.

6. Geo-informatics and Nano-technology 2(1+1) MM:75

Theory
Geo-informatics - definition, concepts, tool and techniques; their use in Precision Agriculture. Crop discrimination and Yield monitoring, soil mapping; fertilizer recommendation using geospatial technologies; Spatial data and their management in GIS; Remote sensing concepts and application in agriculture; Image processing and interpretation; Global positioning system (GPS), components and its functions; Introduction to crop Simulation Models and their uses for optimization of Agricultural Inputs; STCR approach for precision agriculture; Nanotechnology, definition, concepts and techniques, brief introduction about nano-scale effects, nano-particles, nano-pesticides, nano-fertilizers, nano-sensors. Use of nanotechnology in seed, water, fertilizer, plant protection for scaling-up farm productivity.

**Practical**

7. Environmental Studies and Disaster Management 3 (2+1) MM:75

**Theory**

Disaster Management- Natural Disasters, Man Made Disasters, Disaster Management

**Practical**

Pollution case studies. Case Studies- Field work: Visit to a local area to document environmental assets river/ forest/ grassland/ hill/ mountain, visit to a local polluted site-Urban/Rural/Industrial/ Agricultural, study of common plants, insects, birds and study of simple ecosystems-pond, river, hill slopes, etc. Study of pollutants and contaminants.

8. Agrochemicals 3 (2+1) (Elective Course) MM:75

**Theory**

An introduction to agrochemicals, their type and role in agriculture, effect on environment, soil, human and animal health, merits and demerits of their uses in agriculture, management of agrochemicals for sustainable agriculture.

**Herbicides**- Major classes, properties and important herbicides. Fate of herbicides.

**Fungicides** - Classification – Inorganic fungicides - characteristics, preparation and use of sulfur and copper, Mode of action-Bordeaux mixture and copper oxychloride.

**Organic fungicides**- Mode of action- Dithiocarbamates-characteristics, preparation and use of Zineb and maneb.

**Systemic fungicides**- Benomyl, carboxin, oxycarboxin, Metalaxyl, Carbendazim, characteristics and use. Introduction and classification of insecticides: inorganic and organic insecticides Organochlorine, Organophosphates, Carbamates, Synthetic pyrethroids Neonicotinoids, Biorationals, Insecticide Act and rules, Insecticides banned, withdrawn and restricted use, Fate of insecticides in soil & plant. IGRs Biopesticides, Reduced risk insecticides, Botanicals, plant and animal systemic insecticides their characteristics and uses.

**Fertilizers and their importance**. Nitrogenous fertilizers: Feedstocks and Manufacturing of ammonium sulphate, ammonium nitrate, ammonium chloride, urea. Slow release N-fertilizers.

**Phosphatic fertilizers**: feedstock and manufacturing of single superphosphate. Preparation of bone meal and basic slag. Potassic fertilizers: Natural sources of potash, manufacturing of
potassium chloride, potassium sulphate and potassium nitrate.

**Practical**

**IV. AGRICULTURAL ENTOMOLOGY**

1. **Fundamentals of Entomology**

   **Part – I**

   **Part-II**

   **Practical**

   Methods of collection and preservation of insects including immature stages; External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts and legs; Wing venation, types of wings and wing coupling apparatus. Types of insect larvae and pupae; Dissection of digestive system in insects (Grasshopper); Dissection of male and female reproductive systems in insects (Grasshopper).
2. Agricultural Heritage

Theory
Introduction of Indian agricultural heritage; Ancient agricultural practices, Relevance of heritage to present day agriculture; Past and present status of agriculture and farmers in society; Journey of Indian agriculture and its development from past to modern era; Plant production and protection through indigenous traditional knowledge; Crop voyage in India and world; Agriculture scope; Importance of agriculture and agricultural resources available in India; Crop significance and classifications; National agriculture setup in India; Current scenario of Indian agriculture; Indian agricultural concerns and future prospects.

3. Insect Systematic and IPM

Part I

Part – II
Systematics: Taxonomy –importance, history and development and binomial nomenclature. Definitions of Biotype, Sub-species, Species, Genus, Family and Order. Classification of class Insecta upto Orders, basic groups of present day insects with special emphasis to orders and families of Agricultural importance like Orthoptera: Acrididae, Tettigonidae, Gryllidae, Gryllotalpidae; Dictyoptera: Mantidae, Blattidae; Odonata: Isoptera: Termiidae; Thysanoptera: Thripidae; Hemiptera: Pentatomidae, Coreidae, Cimicidae, Pyrrhocoridae, Lygaeidae, Cicadellidae, Delphacidae, Aphididae, Coccidae, Lophophoridae, Aleurodidae, Pseudococcidae; Neuroptera: Chrysopidae; Lepidoptera: Pieridae, Papiloinidae, Noctuidae, Sphingidae, Pyralidae, Gelechiidae, Arctiidae, Saturnidae, Bombycidae; Coleoptera: Coccinellidae, Chrysomelidae, Cerambycidae, Curculionidae, Bruchidae, Scarabaeidae; Hymenoptera: Tenthridinidae, Apidae. Trichogrammatidae, Ichneumonidae, Braconidae, Chalcididae; Diptera: Cecidomyiidae, Tachinidae, Agromyziidae, Culicidae, Muscidae, Tephritidae.

Practical

4. Pests of Crops and Stored Grains and their Management

Theory
General account on nature and type of damage by different arthropods pests. Management of major pests and scientific name, order, family, host range, distribution, nature of damage and control practice other important arthropod pests of various field crop, vegetable crop, fruit crop, plantation crops, ornamental crops, spices and condiments. Factors affecting losses of stored grain and role of physical, biological, mechanical and chemical factors in deterioration of grain. Insect pests, mites, rodents, birds and microorganisms associated with stored grain and their management. Storage structure and methods of grain storage and fundamental principles of grain store management.

**Practical**

Identification of different types of damage. Identification and study of life cycle and seasonal history of various insect pests attacking crops and their produce: (a) Field Crops; (b) Vegetable Crops; (c) Fruit Crops; (d) Plantation, gardens. Identification of insect pests and Mites associated with stored grain. Determination of insect infestation by different methods. Assessment of losses due to insects. Calculations on the doses of insecticides application technique. Fumigation of grain store / godown. Identification of rodents and rodent control operations in godowns. Identification of birds and bird control operations in godowns. Determination of moisture content of grain. Methods of grain sampling under storage condition. Visit to Indian Storage Management and Research Institute, Hapur and Quality Laboratory, Department of food, Delhi. Visit to nearest FCI godowns.

5. **Management of Beneficial Insects**

**Theory**

**Practical**

training institutions devoted to beekeeping, sericulture, lac culture and natural enemies. Identification and techniques for mass multiplication of natural enemies.

6. Biopesticides and Biofertilizers 3(2+1) (Elective Course)MM:75

Theory

Practical MM:25

V. AGRICULTURAL ECONOMICS AND STATISTICS

1. Fundamentals of Agricultural Economics 3(3+0) MM:75

Theory

Economics: Meaning, scope and subject matter, definitions, activities, approaches to economic analysis; micro and macro economics, positive and normative analysis. Nature of economic theory. Basic concepts: Goods and services, desire, want, demand, utility, cost and price, wealth, capital, income and welfare. Agricultural economics: meaning, definition, characteristics of agriculture, importance and its role in economic development. Demand: meaning, law of demand, schedule and demand curve, determinants, utility theory; law
of diminishing marginal utility, equi-marginal utility principle. Concept of consumer surplus. Elasticity of demand: concept and measurement of price elasticity, income elasticity and cross elasticity. **Production:** Factors of production, input output relationship. **Laws of returns:** Law of variable proportions and law of returns to scale. **Cost:** concepts, short run and long run cost curves. **Supply:** Stock v/s supply, law of supply, schedule, supply curve, determinants of supply, elasticity of supply. **Market structure:** meaning and types of market, basic features of perfectly competitive and imperfect markets. Price determination under perfect competition; short run and long run equilibrium of firm and industry, Distribution theory: meaning, factor market and pricing of factors of production. Concepts of rent, wage, interest and profit. **National income:** Meaning and importance, concepts of national income accounting and approaches to measurement, difficulties in measurement. **Money:** Meaning and functions of money, classification of money, supply, general price index, inflation and deflation. **Banking:** Role in modern economy, types of banks, functions of commercial and central bank, credit creation policy.

**Assignment**

<thead>
<tr>
<th>Assignment</th>
<th>MM:25</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>2. Agri-Informatics and Computer Application</strong></td>
<td><strong>3(2+1) MM:75</strong></td>
</tr>
</tbody>
</table>

**Theory**

**Practical**

Study of Computer Components, accessories, practice of important DOS Commands. Introduction of different operating systems such as windows, Unix/Linux, Creating, Files & Folders, File Management. Use of MS-WORD and MS Power-point for creating, editing and presenting a scientific Document. MS-EXCEL - Creating a spreadsheet, use of statistical tools, writing expressions, creating graphs, analysis of scientific data. MS-ACCESS: Creating Database, preparing queries and reports, demonstration of Agri-information system. Introduction to World Wide Web (www). Introduction of programming languages. Hands on Crop Simulation Models (CSM) such as DSSAT/Crop-Info/CropSyst/Wofost; Computation of water and nutrient requirements of crop using CSM and IT tools. Introduction of Geospatial Technology for

3. Agricultural Statistics and Mathematics 3 (2+1) MM:75

Theory

Statistical Methods: Introduction to Statistics and its Applications in Agriculture, Graphical Representation of Data, Measures of Central Tendency & Dispersion, Definition of Probability, Addition and Multiplication Theorem (without proof). Simple Problems Based on Probability. Definition of Correlation, Scatter Diagram. Karl Pearson’s Coefficient of Correlation. Linear Regression Equations. Introduction to Test of Significance, One sample & two sample test t for Means, Chi-Square Test. Introduction to Analysis of Variance, Analysis of One Way Classification. Introduction to Sampling Methods, Simple Random Sampling with and without replacement. Elementary Mathematics: Straight lines: Distance formula, section formula (internal and external division), Equation of co-ordinate axes, Equation of lines parallel to axes, Slope-intercept form of equation of line, Slope-point form of equation of line, Two point form of equation of line, Intercept form of equation of line, Normal form of equation of line, Point of intersection of two st. lines, Angles between two st. lines, Parallel lines, Perpendicular lines. Derivatives of sum, difference, product and quotient of two functions, Matrices and Determinants: Definition of Matrices, Addition, Subtraction, Multiplication, Transpose and Inverse up to 2nd order.

Practical MM:25

4. Agricultural Finance and Co-Operation 3(2+1) MM:75

Theory

Agricultural Finance- meaning, scope and significance, credit needs and its role in Indian agriculture. Agricultural credit: meaning, definition, need, classification. Credit analysis: 4 R’s, and 3C’s of credits. Sources of agricultural finance: institutional and non-institutional sources, commercial banks, social control and nationalization of commercial banks, Micro financing including KCC. Lead bank scheme, RRBs. An introduction to higher financing institutions–RBI, NABARD, ADB, IMF, World bank, Insurance and Credit Guarantee Corporation of India. Cost of credit. Recent development in agricultural credit. Agricultural Cooperation – Meaning, brief history of cooperative development in India, objectives, principles of cooperation, significance of cooperatives in Indian agriculture. Agricultural Cooperation in
India: credit, marketing, consumer and multi-purpose cooperatives, farmers’ service cooperative societies, processing cooperatives, farming cooperatives, cooperative warehousing; role of ICA, NCUI, NCDC, NAFED.

Practical
Schedule: 3(2+1) MM: 75

**Theory**

**Agricultural Marketing:** Concepts and definitions of market, marketing, agricultural marketing, market structure, marketing mix and market segmentation, classification and characteristics of agricultural markets; demand, supply and producer’s surplus of agri-commodities: nature and determinants of demand and supply of farm products, producer’s surplus – meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agri-commodities; market promotion – advertising, personal selling, sales promotion and publicity - their meaning and merits & demerits; marketing process and functions: Marketing process-concentration, dispersion and equalization; physical functions – storage, transport and processing; facilitating functions–packaging, branding, grading, quality control and labeling (Agmark); Market functionaries and marketing channels: Types and importance of agencies involved in agricultural marketing; meaning and definition of marketing channel; number of channel levels; marketing channels for different farm products; Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread, Role of Govt. in agricultural marketing; Public sector institutions- CWC, SWC & FCI; their objectives and functions. Agricultural prices and policy: Minimum support price, meaning and functions of price; need for agricultural price policy; Trade: Concept of International Trade and its need. Present status and prospects of international trade in agri-commodities; GATT and WTO; Agreement on Agriculture (AoA) and its implications on Indian agriculture; IPR.

**Practical**

Schedule: 3(2+1) MM: 25

Study of relationship between market arrivals and prices of some selected commodities; Computation of marketable and marketed surplus of important commodities; Study of price
behavior overtime for some selected commodities; Construction of index numbers; Visit to a local market to study various marketing functions performed by different agencies, identification of marketing channels for selected commodity, collection of data regarding marketing costs, margins and price spread and presentation of report in the class; Visit to market institutions – NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning.

6. Farm Management, Production and Resource Economics 3(2+1) MM:75

Theory
Meaning and concept of farm management, objectives and relationship with other sciences. Meaning and definition of farms, its types and characteristics, factor determining types and size of farms. Principles of farm management: concept of production function and its type, use of production function in decision-making on a farm, factor-product, factor-factor and product-product relationship, law of equi-marginal or principles of opportunity cost and law of comparative advantage. Meaning and concept of cost, types of costs and their interrelationship, importance of cost in managing farm business and estimation of gross farm income, net farm income, family labour income and farm business income. Farm business analysis: meaning and concept of farm income and profitability, technical and economic efficiency measures in crop and livestock enterprises. Importance of farm records and accounts in managing a farm, various types of farm records needed to maintain on farm, farm inventory. Meaning and importance of farm planning and budgeting, partial and complete budgeting, steps in farm planning and budgeting-linear programming, appraisal of farm resources, selection of crops and livestock’s enterprises. Concept of risk and uncertainty occurs in agriculture production, nature and sources of risks and its management strategies, Crop/livestock/machinery insurance– weather based crop insurance, features, determinants of compensation. Unique properties of natural resources. Positive and negative externalities in agriculture, Inefficiency and welfare loss, solutions, Important issues in economics and management of common property resources of land, water, pasture and forest resources etc.

Practical MM:25
Preparation of farm layout, Determination of cost of fencing of a farm. Computation of depreciation cost of farm assets. Application of equi-marginal returns/opportunity cost principle in allocation of farm resources. Determination of most profitable level of inputs use in a farm production process. Determination of least cost combination of inputs. Selection of most profitable enterprise combination. Application of cost principles including CACP concepts in the estimation of cost of crop and livestock enterprises. Preparation of farm plan and budget, farm records and accounts and profit & loss accounts. Collection and analysis of data on various resources in India.

7. Agri-business Management 3 (2+1) MM:75
Theory

Practical

VI. AGRICULTURAL ENGINEERING
1. Farm Machinery and Power

Theory
Elementary idea of surveying, leveling, farm layout, irrigation and drainage. Status of Farm Power in India, Sources of Farm Power, I.C. engines, working principles of I C engines, comparison of two stroke and four stroke cycle engines, Study of different components of I.C. engine, I.C. engine terminology and solved problems, Familiarization with different systems of I.C. engines: Air cleaning, cooling, lubrication, fuel supply and hydraulic control system of a tractor, Familiarization with Power transmission system: clutch, gear box, differential and final drive of a tractor, Tractor types, Cost analysis of tractor power and attached implement, Familiarization
with Primary and Secondary Tillage implement, Implement for hill agriculture, implement for intercultural operations, Familiarization with sowing and planting equipment, calibration of a seed drill and solved examples, Familiarization with Plant Protection equipment, Familiarization with harvesting and threshing equipment.

**Practical**  
MM:25  
Surveying, leveling by use of different methods and tools, farm layout-laying out contour lines and drawing contour maps, laying out field boundaries, farm roads, farm buildings farm fencing, irrigation. Irrigation & drainage- measurement of irrigation water. Determination of cross-section and dimensions, determination of irrigation application efficiency. Study of different components of I.C. engine. To study air cleaning and cooling system of engine, Familiarization with clutch, transmission, differential and final drive of a tractor, Familiarization with lubrication and fuel supply system of engine, Familiarization with brake, steering, hydraulic control system of engine, Learning of tractor driving, Familiarization with operation of power tiller, Implements for hill agriculture, Familiarization with different types of primary and secondary tillage implements: mould plough, disc plough and disc harrow. Familiarization with seedcum-fertilizer drills their seed metering mechanism and calibration, planters and transplanter Familiarization with different types of sprayers and dusters Familiarization with different intercultivation equipment, Familiarization with harvesting and threshing machinery.

**2. Renewable Energy and Green Technology**  
2(1+1) MM:75  
**Theory**  
Classification of energy sources, contribution of these of sources in agricultural sector, Familiarization with biomass utilization for biofuel production and their application, Familiarization with types of biogas plants and gasifiers, biogas, bioalcohol, biodiesel and biooil production and their utilization as bioenergy resource, introduction of solar energy, collection and their application, Familiarization with solar energy gadgets: solar cooker, solar water heater, application of solar energy: solar drying, solar pond, solar distillation, solar photovoltaic system and their application, introduction of wind energy and their application.

**Practical**  
MM:25  
Familiarization with renewable energy gadgets. To study biogas plants, To study gasifier, To study the production process of biodiesel, To study briquetting machine, To study the production process of bio-fuels. Familiarization with different solar energy gadgets. To study solar photovoltaic system: solar light, solar pumping, solar fencing. To study solar cooker, To study solar drying system. To study solar distillation and solar pond.

**3. Protected Cultivation and Secondary Agriculture**  
2(1+1) MM:75  
**Theory**  
Green house technology: Introduction, Types of Green Houses; Plant response to Green house
environment, Planning and design of greenhouses, Design criteria of green house for cooling and heating purposes. Green house equipments, materials of construction for traditional and low cost green houses. Irrigation systems used in greenhouses, typical applications, passive solar green house, hot air green house heating systems, green house drying. Cost estimation and economic analysis. Important Engineering properties such as physical, thermal and aero & hydrodynamic properties of cereals, pulses and oilseed, their application in PHT equipment design and operation. Drying and dehydration; moisture measurement, EMC, drying theory, various drying method, commercial grain dryer (deep bed dryer, flat bed dryer, tray dryer, fluidized bed dryer, recirculatory dryer and solar dryer). Material handling equipment; conveyor and elevators, their principle, working and selection.

Practical

Study of different type of green houses based on shape. Determine the rate of air exchange in an active summer winter cooling system. Determination of drying rate of agricultural products inside green house. Study of green house equipments. Visit to various Post Harvest Laboratories. Determination of Moisture content of various grains by oven drying & infrared moisture methods. Determination of engineering properties (shape and size, bulk density and porosity of biomaterials). Determination of Moisture content of various grains by moisture meter. Field visit to seed processing plant.

4. System Simulation and Agro-advisory 3(2+1) (Elective Course) MM:75

Theory

System Approach for representing soil-plant-atmospheric continuum, system boundaries, Crop models, concepts & techniques, types of crop models, data requirements, relational diagrams. Evaluation of crop responses to weather elements; Elementary crop growth models; calibration, validation, verification and sensitivity analysis. Potential and achievable crop production- conceptandmodelling techniques for their estimation. Crop production in moisture and nutrients limited conditions; components of soil water and nutrients balance. Weather forecasting, types, methods, tools & techniques, forecast verification; Value added weather forecast, ITK for weather forecast and its validity; Crop-Weather Calendars; Preparation of agro-advisory bulletin based on weather forecast. Use of crop simulation model for preparation of Agro-advisory and its effective dissemination.

Practical

VII. PLANT PATHOLOGY

1. Fundamentals of Plant Pathology 4(3+1) MM:75

Theory

Fungi: general characters, definition of fungus, somatic structures, types of fungal thalli, fungal tissues, modifications of thallus, reproduction (asexual and sexual). Nomenclature, Binomial system of nomenclature, rules of nomenclature, classification of fungi. Key to divisions, sub-divisions, orders and classes.

Bacteria and mollicutes: general morphological characters. Basic methods of classification and reproduction.

Viruses: nature, structure, replication and transmission. Study of phanerogamic plant parasites.

Nematodes: General morphological characters and importance of plant nematodes (Heterodera, Meloidogyne, Anguina)

Practical

MM:25

2. Diseases of Field & Horticultural Crops & their Management-I 3(2+1) MM:75

Theory

Symptoms, etiology, disease cycle and management of major diseases of following crops:

Field Crops: Rice: blast, brown spot, bacterial blight, sheath blight, false smut, khaira and tungro; Maize: smut, downy mildew, leaf spots; Sorghum: anthracnose, Bajra: downy mildew and ergot; Groundnut: early and late leaf spots, wilt; Pigeonpea: Phytophthora blight, wilt and sterility mosaic; black & greengram: Cercospora leaf spot and anthracnose, web blight and yellow mosaic; Tobacco: mosaic. Horticultural Crops: Guava: wilt and anthracnose; Banana: Panama wilt, bacterial wilt, Sigatoka and bunchy top; Papaya: foot rot, leaf curl and mosaic,
Pomegranate: bacterial blight; Cruciferous vegetables: Alternaria leaf spot and black rot; Brinjal: Phomopsis blight and fruit rot and Sclerotinia blight; Tomato: damping off, wilt, early and late blight, leaf curl; Okra: Yellow Vein Mosaic; Beans: anthracnose; Ginger: soft rot; Colocasia: Phytophthora blight; Coconut: wilt and bud rot; Tea: blister blight; Coffee: rust

**Practical**

Identification and histopathological studies of selected diseases of field and horticultural crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for Herbarium; Note: Students should submit 50 pressed and well-mounted specimens.

3. Diseases of Field and Horticultural Crops & their Management-II 3(2+1) MM:75

**Theory**

Symptoms, etiology, disease cycle and management of following diseases:

**Field Crops:**
Wheat: rusts, loose smut, karnal bunt, powdery mildew, and ear cockle; Sugarcane: red rot, smut, wilt, grassy shoot, ratoon stunting; Sunflower: Sclerotinia stem rot and Alternaria blight; Mustard: Alternaria blight, white rust, downy mildew and Sclerotinia stem rot; Gram: wilt, grey mould and Ascochyta blight; Lentil: rust and wilt; Cotton: anthracnose, vascular wilt, and black arm; Pea: downy mildew, powdery mildew and rust.

**Horticultural Crops:**
Mango: anthracnose, malformation, bacterial blight and powdery mildew; Citrus: canker and gummosis; Grape vine: downy mildew, Powdery mildew and anthracnose; Apple: scab, powdery mildew, fire blight and crown gall; Peach: leaf curl; Potato: early and late blight, black scurf, and mosaic; Cucurbits: downy mildew, powdery mildew, wilt; Onion and garlic: purple blotch, and Stemphylium blight; Chillies: anthracnose and fruit rot, wilt and leaf curl; Turmeric: leaf spot.
Coriander: stem gall; Marigold: Botrytis blight; Rose: dieback, powdery mildew and black leaf spot.

**Practical**

Identification and histopathological studies of selected diseases of field and horticultural crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for herbarium.
*Note:* Students should submit 50 pressed and well-mounted specimens.

4. Principles of Integrated Pest and Disease Management 3(2+1) MM:75

**Theory**

Entomology
Categories of insect pests: IPM: Introduction, history, importance, concepts, principles and tools of IPM. Economic importance of insect pests and pest risk analysis. Methods of detection and diagnosis of insect pest. Calculation and dynamics of economic injury level and importance of

**Plant Pathology**

**Practical**
Methods of diagnosis and detection of various insect pests, and plant diseases. Methods of insect pests and plant disease measurement. Assessment of crop yield losses, calculations based on economics of IPM. Identification of biocontrol agents, different predators and natural enemies. Mass multiplication of *Trichoderma, Pseudomonas, Trichogramma, NPV* etc. Identification and nature of damage of important insect pests and diseases and their management. Crop (agroecosystem) dynamics of a selected insect pest and diseases. Plan & assess preventive strategies (IPM module) and decision making. Crop monitoring attacked by insect, pest and diseases. Awareness campaign at farmers’ fields.

**VIII. HORTICULTURE**

1. **FUNDAMENTALS OF HORTICULTURE**

**Theory**
Horticulture - Its definition and branches, importance and scope; horticultural and botanical classification; climate and soil for horticultural crops; Plant propagation-methods and propagating structures; Seed dormancy, Seed germination, principles of orchard establishment; Principles and methods of training and pruning, juvenility and flower bud differentiation; unfruitfulness; pollination, pollinizers and pollinators; fertilization and parthenocarpy; medicinal and aromatic plants; importance of plant bio-regulators in horticulture. Irrigation – methods, Fertilizer application in horticultural crops.

**Practical**

2. **Production Technology for Fruit and Plantation Crops**

2(1+1) MM:75
Theory
Importance and scope of fruit and plantation crop industry in India; Importance of rootstocks; Production technologies for the cultivation of major fruits-mango, banana, citrus, grape, guava, litchi, papaya, sapota, apple, pear, peach, walnut, almond and; minor fruits- date, ber, pineapple, pomegranate, jackfruit, strawberry, plantation crops-coconut, arecanut, cashew, tea, coffee & rubber.

Practical

3. Production Technology for Vegetable and Spices 2 (1+1) MM:75

Theory
Importance of vegetables & spices in human nutrition and national economy, kitchen gardening, brief about origin, area, climate, soil, improved varieties and cultivation practices such as time of sowing, transplanting techniques, planting distance, fertilizer requirements, irrigation, weed management, harvesting and yield, physiological disorders, of important vegetable and spices (Tomato, Brinjal, Chilli, Capsicum, Cucumber, Melons, Gourds, Pumpkin, French bean, Peas; Cole crops such as Cabbage, Cauliflower, Knol-khol; Bulb crops such as Onion, Garlic; Root crops such as Carrot, Raddish, Beetroot; Tuber crops such as Potato; Leafy vegetables such as Amaranth, Palak. Perennial vegetables).

Practical

4. Production Technology for Ornamental Crops, MAPs and Landscaping 2 (1+1) MM:75

Theory
Importance and scope of ornamental crops, medicinal and aromatic plants and landscaping. Principles of landscaping. Landscape uses of trees, shrubs and climbers. Production technology of important cut flowers like rose, gerbera, carnation, lilium and orchids under protected conditions and gladiolus, tuberose, chrysanthemum under open conditions. Package of practices for loose flowers like marigold and jasmine under open conditions. Production technology of important medicinal plants like ashwagandha, asparagus, aloe, costus, Cinnamomum, periwinkle, isabgoland aromatic plants like mint, lemongrass, citronella, palmarosa, ocimum, rose, geranium, vetiver. Processing and value addition in ornamental crops and MAPs produce.

Practical
 MM:25

53

5. Post-harvest Management and Value Addition of Fruits and Vegetables 2(1+1) MM: 75

Theory
Importance of post-harvest processing of fruits and vegetables, extent and possible causes of post harvest losses; Pre-harvest factors affecting postharvest quality, maturity, ripening and changes occurring during ripening; Respiration and factors affecting respiration rate; Harvesting and field handling; Storage (ZECC, cold storage, CA, MA, and hypobaric); Value addition concept; Principles and methods of preservation; Intermediate moisture food - Jam, jelly, marmalade, preserve, candy – Concepts and Standards; Fermented and non-fermented beverages. Tomatoproducts - Concepts and Standards; Drying/ Dehydration of fruits and vegetables – Concept and methods, osmotic drying. Canning -- Concepts and Standards, packaging of products.

Practical  MM: 25

6. Landscaping  3(2+1) Elective Course) MM: 75

Theory
Practical
Identification of trees, shrubs, annuals, pot plants; Propagation of trees, shrubs and annuals, care and maintenance of plants, potting and repotting, identification of tools and implements used in landscape design, training and pruning of plants for special effects, lawn establishment and maintenance, layout of formal gardens, informal gardens, special type of gardens (sunken garden, terrace garden, rock garden) and designing of conservatory and lathe house. Use of computersoftware, visit to important gardens/ parks/ institutes.

7. Hi-tech. Horticulture 3(2+1) (Elective Course) MM:75
Theory
Introduction & importance; Nursery management and mechanization; micro propagation of horticultural crops; Modern field preparation and planting methods, Protected cultivation: advantages, controlled conditions, method and techniques, Micro irrigation systems and its components; EC, pH based fertilizer scheduling, canopy management, high density orcharding, Components of precision farming, Variable Rate applicator (VRA), application of precision farming in horticultural crops (fruits, vegetables and ornamental crops); mechanized harvesting of produce.

Practical MM:25
Types of polyhouses and shade net houses, Intercultural operations, tools and equipments identification and application, Micro propagation, Nursery-protrays, micro-irrigation, EC, pH based fertilizer scheduling, canopy management, visit to hi-tech orchard/nursery.

8. Micro propagation Technologies 3(1+2) (Elective Course) MM:75
Theory
Introduction, History, Advantages and limitations; Types of cultures (seed, embryo, organ, callus, cell), Stages of micropropagation, Axillary bud proliferation (Shoot tip and meristem culture, bud culture), Organogenesis (callus and direct organ formation), Somatic embryogenesis, cell suspension cultures, Production of secondary metabolites, Somaclonal variation, Cryopreservation

Practical MM:25
Identification and use of equipments in tissue culture Laboratory, Nutrition media composition, sterilization techniques for media, containers and small instruments, sterilization techniques for explants, Preparation of stocks and working solution, Preparation of working medium, Culturing of explants: Seeds, shoot tip and single node, Callus induction, Induction of somatic embryos regeneration of whole plants from different explants, Hardening procedures.

IX. SOIL CONSERVATION

1. INTRODUCTORY AGRO-METEOROLOGY AND CLIMATE CHANGE 2(1+1)MM:75
Theory
Meaning and scope of agricultural meteorology; Earth atmosphere- its composition, extent and structure; Atmospheric weather variables; Atmospheric pressure, its variation with height; Wind; types of wind, daily and seasonal variation of wind speed, cyclone, anticyclone, land breeze and sea breeze; Nature and properties of solar radiation, solar constant, depletion of solar radiation; short wave, longwave and thermal radiation, net radiation, albedo; Atmospheric temperature, temperature inversion, lapse rate, daily and seasonal variations of temperature, vertical profile of temperature; Energy balance of earth; Atmospheric humidity, concept of saturation, vapor pressure, process of condensation, formation of dew, fog, mist, frost, cloud; Precipitation, process of precipitation, types of precipitation such as rain, snow, sleet, and hail, cloud formation and classification; Artificial rainmaking. Monsoon- mechanism and importance in Indian agriculture, weather hazards - drought, floods, frost, tropical cyclones and extreme weather conditions such as heat-wave and cold-wave. Agriculture and weather relations; Modifications of crop microclimate, climatic normals for crop and livestock production. Weather forecasting- types of weather forecast and their uses. Climate change, climatic variability, global warming, causes of climate change and its impact on regional and national Agriculture.

**Practical**

**2. INTRODUCTORY SOIL AND WATER CONSERVATION**

**Theory**

**Practical**

General status of soil conservation in India. Calculation of erosion index. Estimation of soil

3. RAINFED AGRICULTURE AND WATERSHED MANAGEMENT 2(1+1) MM:75
Theory
Rainfed agriculture: Introduction, types, History of rainfed agriculture and watershed in India; Problems and prospects of rainfed agriculture in India; Soil and climatic condition prevalent in rainfed areas; Soil and water conservation techniques, Drought: types, effect of water deficit on physio-morphological characteristics of the plants, Crop adaptation and mitigation to drought; Water harvesting: importance, its techniques, Efficient utilization of water through soil and crop management practices, Management of crops in rainfed areas, Contingent crop planning for aberrant weather conditions, Concept, objective, principles and components of watershed management, factors affecting watershed management.

Practical MM:25
Studies on climate classification, studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons. Studies on cropping pattern of different rainfed areas in the country and demarcation of rainfed area on map of India. Interpretation of meteorological data and scheduling of supplemental irrigation on the basis of evapo-transpiration demand of crops. Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation. Studies on cultural practices for mitigating moisture stress. Characterization and delineation of model watershed. Field demonstration on soil & moisture conservation measures. Field demonstration on construction of water harvesting structures. Visit to rainfed research station/watershed.

4. INTRODUCTORY FORESTRY 3(2+1) MM:75
Theory
Introduction – definitions of basic terms related to forestry, objectives of silviculture, forest classification, salient features of Indian Forest Policies. Forest regeneration, Natural regeneration, Natural regeneration from seed and vegetative parts, coppicing, pollarding, root suckers; Artificial regeneration – objectives, choice between natural and artificial regeneration, essential preliminary considerations. Crown classification. Tending operations – weeding, cleaning, thinning – mechanical, ordinary, crown and advance thinning. Forest mensuration – objectives, diameter measurement, instruments used in diameter measurement; Non instrumental methods of height measurement - shadow and single pole method; Instrumental methods of height measurement- geometric and trigonometric principles, instruments used in height measurement; tree stem form, form factor, form quotient, measurement of volume of felled and standing trees, age determination of trees. Agroforestry – definitions, importance, criteria of selection of trees in
agroforestry, different agroforestry systems prevalent in the country, shifting cultivation, taungya, alley cropping, wind breaks and shelter belts, home gardens. Cultivation practices of two important fast growing tree species of the region.

**Practical**

**X. AGRICULTURAL EXTENSION AND COMMUNICATION**

1. **Comprehension and Communication Skills in English 2(1+1) MM:75**

---

**Theory**

**Practical**

2. **Fundamentals of Agricultural Extension Education 3(2+1)MM:75**

---

**Theory**

**Education**: Meaning, definition & Types; Extension Education- meaning, definition, scope and process; objectives and principles of Extension Education; Extension Programme planning-Meaning, Process, Principles and Steps in Programme Development. Extension systems in India: extension efforts in pre-independence era (Sriniketan, Marthandam, Firka Development Scheme, Gurgaon Experiment, etc.) and post-independence era (Etawah Pilot Project, Nilokheri Experiment, etc.); various extension/ agriculture development programmes launched by ICAR/
Govt. of India (IADP, IAAP, HYVP, KVK, IVLP, ORP, ND, NATP, NAIP, etc.). New trends in agriculture extension: privatization extension, cyber extension/ e-extension, market-led extension, farmer-led extension, expert systems, etc.

Rural Development: concept, meaning, definition; various rural development programmes launched by Govt. of India. Community Dev.- meaning, definition, concept & principles, Philosophy of C.D. Rural Leadership: concept and definition, types of leaders in rural context; extension administration: meaning and concept, principles and functions. Monitoring and evaluation: concept and definition, monitoring and evaluation of extension programmes; transfer of technology: concept and models, capacity building of extension personnel; extension teaching methods: meaning, classification, individual, group and mass contact methods, ICT Applications in TOT (New and Social Media), media mix strategies; communication: meaning and definition; Principles and Functions of Communication, models and barriers to communication. Agriculture journalism; diffusion and adoption of innovation: concept and meaning, process and stages of adoption, adopter categories.

**Practical**

MM: 25

To get acquainted with university extension system. Group discussion- exercise; handling and use of audio visual equipments and digital camera and LCD projector; preparation and use of AV aids, preparation of extension literature – leaflet, booklet, folder, pamphlet news stories and success stories; Presentation skills exercise; micro teaching exercise; A visit to village to understand the problems being encountered by the villagers/ farmers; to study organization and functioning of DRDA and other development departments at district level; visit to NGO and learning from their experience in rural development; understanding PRA techniques and their application in village development planning; exposure to mass media: visit to community radio and television studio for understanding the process of programme production; script writing, writing for print and electronic media, developing script for radio and television.

**3. Communication Skills and Personality Development**  2 (1+1) MM: 75

**Theory**

Communication Skills: Structural and functional grammar; meaning and process of communication, verbal and nonverbal communication; listening and note taking, writing skills, oral presentation skills; field diary and lab record; indexing, footnote and bibliographic procedures. Reading and comprehension of general and technical articles, precise writing, summarizing, abstracting; individual and group presentations, impromptu presentation, public speaking; Group discussion. Organizing seminars and conferences.

**Practical**

MM: 25

Listening and note taking, writing skills, oral presentation skills; field diary and lab record; indexing, footnote and bibliographic procedures. Reading and comprehension of general and technical articles, precise writing, summarizing, abstracting; individual and group presentations.
4. Rural Sociology and Educational Psychology 2(2+0) MM:75

Theory

Assignment-MM:25

5. Entrepreneurship Development and Business Communication 2 (1+1) MM:75

Theory
Concept of Entrepreneur, Entrepreneurship Development, Characteristics of entrepreneurs; SWOT Analysis & achievement motivation, Government policy and programs and institutions for entrepreneurship development, Impact of economic reforms on Agribusiness/Agri-enterprises,Entrepreneurial Development Process; Business Leadership Skills; Developing organizational skill (controlling, supervising, problem solving, monitoring & evaluation), Developing Managerial skills, Business Leadership Skills (Communication, direction and motivation Skills), Problem solving skill, Supply chain management and Total quality management, Project Planning Formulation and report preparation; Financing of enterprise, Opportunities for agri-entrepreneurship and rural enterprise.

Practical MM:25
Assessing entrepreneurial traits, problem solving skills, managerial skills and achievement motivation, exercise in creativity, time audit through planning, monitoring and supervision, identification and selection of business idea, preparation of business plan and proposal writing, visit to entrepreneurship development institute and entrepreneurs.

6. Agricultural Journalism 3(2+1) (Elective Course) MM:75

Theory
Agricultural Journalism: The nature and scope of agricultural journalism characteristics and training of the agricultural journalist, how agricultural journalism is similar to and different from other types of journalism. Newspapers and magazines as communication media: Characteristics, kinds and functions of newspapers and magazines, characteristics of newspaper and magazine readers. Form and content of newspapers and magazines: Style and language of newspapers and magazines, parts of newspapers and magazines. The agricultural story: Types of agricultural stories, subject matter of the agricultural story, structure of the agricultural story. Gathering agricultural information: Sources of agricultural information, interviews, coverage of events, abstracting from research and scientific materials, wire services, other agricultural news sources. Writing the story: Organizing the material, treatment of the story, writing the news lead and the body, readability measures. Illustrating agricultural stories: Use of photographs, use of
artwork (graphs, charts, maps, etc.), writing the captions. Editorial mechanics: Copy reading, headline and title writing, proofreading, layout.

**Practical**

Practice in interviewing. Covering agricultural events. Abstracting stories from research and scientific materials and from wire services. Writing different types of agricultural stories. Selecting pictures and artwork for the agricultural story. Practice in editing, copy reading, headline and title writing, proofreading, layout. Testing copy with a readability formula. Visit to a publishing office.

**XI. ANIMAL HUSBANDRY AND DAIRYING**

1. **INTRODUCTORY ANIMAL HUSBANDRY**  

   Importance of live stock in agriculture and economy. Important Indian and exotic breeds of cattle, buffalo, sheep, goat, swine. Dairying under specialized and mixed farming, live stock and milk production statistics. Dairy Cattle and Buffaloes management: cattle and buffaloes breeds, breeding methods and systems, care and management of pregnant and milching animals, raising of calves, management of heifer and bulls, maintenance of livestock records, milking methods and principles, clean milk production, feed and feeding. Pig Management: importance, important breeds, raising of piglet up to age of slaughter, general aspect of breeding, care of sow and boar. Sheep and goat: importance, important breeds, raising of kids and lambs, breeding, feeding of goat and sheep. Health Management: Common animal diseases of cattle, buffalo, goat, sheep and swine viz. anthrax, BQ, HS, Brucellosis, Mastitis, swinfever, vaccination schedule.

   **Practical**

   Breeds identification of cattle, buffalo, sheep, goat and pig

2. **HUMAN VALUE AND ETHICS**  

   Theory

   **Assignment**

   MM: 25

3. **LIVESTOCK PRODUCTION AND MANAGEMENT**  

   Theory

   Animal breeding and artificial insemination: Animal breeding - concepts and their application, breed improvement and policy, government and Non-government approaches for breed improvement. Role of livestock in the national economy. Aims of breeder, Mendelian laws,
Heredity and variation, Elementary idea of essential and accessory organs of male and female reproductive system in different farm animals, gametogenesis and oestrus in farm animals, system of breeding in farm animals, their merits and demerits, Artificial Insemination (A.I.), Selection methods, Sire indexing, cattle breeding problems in India and work so far done in this direction.

**Animal feeding and fodder conservation:** Classification of feed stuffs. Nutrients and their functions. Feed ingredients for ration for livestock. Feed supplements and feed additives, conservation of fodder. Customized feeds. Feed formulation and standardization. Elementary idea of digestive system of ruminant and non-ruminant farm animals, Evolution of feeding standards, their merits and demerits and applicability, Ration and principles of rationing, characteristics of ideal ration, food requirements for different life stages in farm animals, computation of ration. Fodder preservation *viz.* Hay and Silage.

**Dairy farm management and health care:** Building: Location and grouping of different dairy farm buildings and sheds. Requirement and arrangement of floor space in various dairy farm buildings. (a) *Fodder requirement:* dairy farm and cropping scheme for the supply of succulent fodders throughout the year, pasture land and their management. Land &labour requirements for a dairy farm, maintenance of different essential dairy farm registers, purchase and culling of dairy cattle. (b) *Animal Health & Hygiene:* Health and diseases management policy for livestock. Symptoms of ill health principles of immunization, first aid in farm animals. Sterility in farm animals, simple obstetrics in farm animals such as abnormal pasteurization, Retention of placenta, prolapse of uterus, milk fever, tymphanitis, impaction of rumen. Elementary idea about poisoning in farm animals. General measure for prevention and control of infectious and contagious diseases, care of down calvers and newly born calf.

**Practical**

**4. INTRODUCTORY DAIRYING SCIENCE**

Colostrum, Physical properties & food value of milk, factors influencing, the quality and quantity of milk produced, PFA/BIS Specifications for different milks production or clean milk, adulteration of milk and its detection. **Milk Processing:** Receiving of milk, staining, filtration, classification, standardization, cooling, pasteurization, sterilization and homogenization, packaging and distribution of milk, Cleaning and sanitization of dairy equipments and Machinery. **Milk Micro Organism:** Types of micro organism in milk, sources of contamination tests employed to ascertain the quality of milk & various quality control measures. Fermentation in milk. **Milk Products:** Cream and Cheese, its composition, different methods of separation and manufacturing, factors affecting the richness, natural cream ripening and ripening with starters, neutralization of cream for butter making. **Butter:**
Composition, manufacturing from ripened cream. Sweet cream and whole milk, Factors influencing churning Judging of butter, common defects of butter and their causes, factors influencing the quality and composition of butter. **GHEE:** Manufacture of ghee from cream and butter. Composition, factors affecting the quality of ghee, AG marking of ghee. **FROZEN and FERMENTED MILK PRODUCTS:** Classification of ice-cream, Role of ingredients, standardization and manufacture of ice-cream. Defects in ice-cream, Marketing of ice-cream. Manufactures of fermented milk products such as Dahi. Cultured butter milk and yoghurt. Condensed and Evaporated milk product. Milk powders and baby food. **INDEGENIOUS MILK PRODUCTS:** Manufacturing techniques of various indigenous milk products such as Chenna & Paneer, Khoa, Rabbari.

**Practical**  
Sampling of milk, Testing of milk for:  
(a) Specific gravity by Lactometer.  
(b) Fat by Garber’s method.  
(c) Solid not fat with the help of formula.  
(d) Total Solid with the help of Richmond’s scale and formula. Determination of Acidity in milk. Detection of Adulteration of milk.  
(a) Extraction of fat or addition of separated milk.  
(b) Addition of water.  
(c) Addition of both separated milk and water. Standardization of milk and cream. Fitting and adjusting of cream separator. Manufacture of dairy product such as butter. Ghee, dahi, Khoachenna, rabbari and ice-cream. Cream separation and neutralization. Judging of milk products.

**5. PRINCIPLES OF FOOD SCIENCE AND NUTRITION**  
**2(2+0) MM:75**

**Theory**  
Concepts of Food Science (definitions, measurements, density, phase change, pH, osmosis, surface tension, colloidal systems etc.); Food composition and chemistry (water, carbohydrates, proteins, fats, vitamins, minerals, flavours, colours, miscellaneous bioactives, important reactions); Food microbiology (bacteria, yeast, moulds, spoilage of fresh & processed foods, Production of fermented foods); Principles and methods of food processing and preservation (use of heat, low temperature, chemicals, radiation, drying etc.); Food and nutrition, Malnutrition (over and undernutrition), nutritional disorders; Energy metabolism (carbohydrate, fat, proteins); Balanced/modified diets, Menu planning, New trends in food science and nutrition.

**Assignment**  
**MM:25**

**6. POULTRY PRODUCTION AND MANAGEMENT**  
**3(2+1)MM:75**

**Development of poultry industry:** Development of poultry industry in India and national poultry improvement plans, Different breeds of chickens for egg and meat production, crosses and their relative importance. **Anatomy and Physiology:** External feature of the Chickens, digestive and reproductive systems, formation and structure of the egg, nutritive value of egg, abnormalities of eggs. **Breeding:** Principles of breeding, Systems of breeding, breeding for egg production and development of strains of broilers selection and Culling, breeding practices. **Incubation of hatching eggs:** Selection handling and care of hatching eggs, natural and artificial
incubation, types of incubators, Factors affecting successful incubation, testing of eggs during incubation, vaccination, packaging and transportation of day old Chicks.

**Brooding of Chicks:** Brooding requirements, natural and artificial brooding, care and management during brooding, types of brooders used and their relative importance. Feeding Principles and Practices: Requirement of nutrients for different age groups of chickens and their sources in the ration, various feeding practices used, feed additive and supplements. Housing, Equipments and Management: Housing system; requirement of house of poultry requirement for different categories of birds, Equipments required in a poultry house, lighting arrangement for poultry, sanitation of poultry house, vaccination Common poultry disease, their control, prevention and treatment such as New Castle, Chicken pox coccidiosis marek’s and C.R.D., External and internal parasites of Poultry.

**Practical**

1-EDUCATIONAL TOUR (Under the supervision of Faculty Dean) 2(0+2) MM:100

2. NSS/NCC/Physical Education and Yoga Practices2 (0+2) non-gradial courses
   MM:100 (Under the supervision of Faculty Dean)

Theory
Course aims at evoking social consciousness among students through various activities viz., working together, constructive and creative social work, to be skilful in executing democratic leadership, developing skill in programme development to be able for self employment, reducing gap between educated and uneducated, increasing awareness and desire to help sections of society.

Following activities are to be taken up under the NSS course:
1. Introduction and basic components of NSS: Orientation
2. NSS programmes and activities
3. Understanding youth
4. Community mobilisation
5. Social harmony and national integration
6. Volunteerism and shramdan
7. Citizenship, constitution and human rights
8. Family and society
9. Importance and role of youth leadership
10. Life competencies
11. Youth development programmes
12. Health, hygiene and sanitation
13. Youth health, lifestyle, HIV AIDS and first aid
14. Youth and yoga
15. Vocational skill development
16. Issues related environment
17. Disaster management
18. Entrepreneurship development
19. Formulation of production oriented project
20. Documentation and data reporting
21. Resource mobilization
22. Additional life skills
23. Activities directed by the Central and State Government

All the activities related to the National Service Scheme course is distributed under four different courses viz., National Service Scheme I, National Service Scheme II, National Service Scheme III and National Service Scheme IV each having one credit load. The entire four courses should be offered continuously for two years. A student enrolled in NSS course should put in at least 60 hours of social work in different activities in a semester other than five regular one day camp in a year and one special camp for duration of 7 days at any semester break period in the twoyear. Different activities will include orientation lectures and practical works. Activities
directed by the Central and State Government have to be performed by all the volunteers of NSS as per direction.

**Semester I**

**Course Title: National Service Scheme I**

**Introduction and basic components of NSS:**

**Orientation:** history, objectives, principles, symbol, badge; regular programmes under NSS,

All the activities related to the National Service Scheme course is distributed under four different courses viz.,

National Service Scheme I,
National Service Scheme II,
National Service Scheme III and
National Service Scheme IV
each having one credit load. The entire four courses should be offered continuously for two years. A student enrolled in NSS course should put in at least 60 hours of social work in different activities in a semester other than five regular one day camp in a year and one special camp for duration of 7 days at any semester break period in the two year. Different activities will include orientation lectures and practical works. Activities directed by the Central and State Government have to be performed by all the volunteers of NSS as per direction.

SYLLABUS

Semester I

Course Title: National Service Scheme I

Introduction and basic components of NSS: Orientation: history, objectives, principles, symbol, badge; regular programmes under NSS, organizational structure of NSS, code of conduct for NSS volunteers, points to be considered by NSS volunteers awareness about health

NSS programmes and activities
Concept of regular activities, special camping, day camps, basis of adoption of village/slums, conducting survey, analysing guiding financial patterns of scheme, youth programme/ schemes of GOI, coordination with different agencies and maintenance of diary

Understanding youth
Definition, profile, categories, issues and challenges of youth; and opportunities for youth who is agent of the social change

Community mobilisation
Mapping of community stakeholders, designing the message as per problems and their culture; identifying methods of mobilisation involving youth-adult partnership

Social harmony and national integration
Indian history and culture, role of youth in nation building, conflict resolution and peace building

Volunteerism and shramdan
Indian tradition of volunteerism, its need, importance, motivation and constraints; shramdan as part of volunteerism

Citizenship, constitution and human rights
Basic features of constitution of India, fundamental rights and duties, human rights, consumer awareness and rights and rights to information

Family and society
Concept of family, community (PRI and other community based organizations) and society

Semester II

Course Title: National Service Scheme II

Importance and role of youth leadership
Meaning, types and traits of leadership, qualities of good leaders; importance and roles of youth leadership

Life competencies
Definition and importance of life competencies, problem-solving and decision-making, inter
personal communication

**Youth development programmes**
Development of youth programmes and policy at the national level, state level and voluntary sector; youth-focused and youth-led organisations

**Health, hygiene and sanitation**
Definition needs and scope of health education; role of food, nutrition, safe drinking water, water born diseases and sanitation (Swachh Bharat Abhiyan) for health; national health programmes and reproductive health.

**Youth health, lifestyle, HIV AIDS and first aid**
Healthy lifestyles, HIV AIDS, drugs and substance abuse, home nursing and first aid

**Youth and yoga**
History, philosophy, concept, myths and misconceptions about yoga; yoga traditions and its impacts, yoga as a tool for healthy lifestyle, preventive and curative method

**Semester III**

**Course Title: National Service Scheme III**

**Vocational skill development**
To enhance the employment potential and to set up small business enterprises skills of volunteers, a list of 12 to 15 vocational skills will be drawn up based on the local conditions and opportunities. Each volunteer will have the option to select two skill-areas out of this list

**Issues related environment**
Environmental conservation, enrichment and sustainability, climatic change, natural resource management (rain water harvesting, energy conservation, forestation, waste land development and soil conservations) and waste management

**Disaster management**
Introduction and classification of disaster, rehabilitation and management after disaster; role of NSS volunteers in disaster management.

**Entrepreneurship development**
Definition, meaning and quality of entrepreneur; steps in opening of an enterprise and role of financial and support service institution.

**Formulation of production oriented project**
Planning, implementation, management and impact assessment of project

**Documentation and data reporting**
Collection and analysis of data, documentation and dissemination of project reports

**Semester IV**

**Course Title: National Service Scheme IV**

**Youth and crime**
Sociological and psychological factors influencing youth crime, cyber crime, peer mentoring in preventing crime and awareness for juvenile justice

**Civil/self defence**
Civil defence services, aims and objectives of civil defence; needs and training of self defence

**Resource mobilisation**
Writing a project proposal of self fund units (SFUs) and its establishment

**Additional life skills**

Positive thinking, self confidence and esteem, setting life goals and working to achieve them, management of stress including time management.

**National Cadet Corps Credit hours:**

2(0+2)MM:100

**Semester I: National Cadet Corps**

1. Aims, objectives, organization of NCC and NCC song. DG’s cardinals of discipline.
2. Drill- aim, general words of command, attention, stands at ease, stand easy and turning.
3. Sizing, numbering, forming in three ranks, open and close order march and dressing.
4. Saluting at the halt, getting on parade, dismissing and falling out.
5. Marching, length of pace, and time of marching in quick/slow time and halt. Side pace, pace forward and to the rear.
6. Turning on the march and wheeling. Saluting on the march.
7. Marking time, forward march and halt.
8. Changing step, formation of squad and squad drill.
9. Command and control, organization, badges of rank, honours and awards
11. Values and ethics, perception, communication, motivation, decision making, discipline and duties of good citizen.
12. Leadership traits, types of leadership. Character/personality development.
13. Civil defense organization, types of emergencies, fire fighting, protection,
14. Maintenance of essential services, disaster management, aid during development projects.
15. Basics of social service, weaker sections of society and their needs, NGO’s and their contribution, contribution of youth towards social welfare and family planning.
17. Preventable diseases including AIDS, safe blood donation, first aid, physical and mental health.
18. Adventure activities
20. Precaution and general behaviour of girl cadets, prevention of untoward incidents, vulnerable parts of the body, self defense.

**Semester II: National Cadet Corps**

2. Shoulder from the order and vice-versa, present from the order and vice-versa.
3. Saluting at the shoulder at the halt and on the march. Short/long trail from the order and vice versa.
4. Guard mounting, guard of honour, Platoon/Coy Drill.
5. Characteristics of rifle (.22/.303/SLR), ammunition, fire power, stripping, assembling, care,
cleaning and sight setting.
8. Theory of groups and snap shooting. Firing at moving targets. Miniature range firing.
9. Characteristics of Carbine and LMG.
10. Introduction to map, scales and conventional signs. Topographical forms and technical terms.
12. Prismatic compass and its use. Setting a map, finding north and own position. Map to ground and ground to map.
13. Knots and lashings, Camouflage and concealment, Explosives and IEDs.
14. Field defenses obstacles, mines and mine lying. Bridging, waterman ship
15. Field water supplies, tracks and their construction.
16. Nuclear, Chemical and Biological Warfare (NCBW)
20. Types of communication, media, latest trends and developments.

Physical Education and Yoga Practices Credit hours: 2(0+2) MM:100

Semester I: Physical Education and Yoga Practices
1. Teaching of skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennikoit)
2. Teaching of different skills of Football – demonstration, practice of the skills, correction, involvement in game situation (For girls teaching of Tennikoit)
3. Teaching of advance skills of Football – involvement of all the skills in game situation with teaching of rules of the game
4. Teaching of skills of Basketball – demonstration, practice of the skills, correction of skills, involvement in game situation
5. Teaching of skills of Basketball – demonstration, practice of the skills, involvement in game situation
6. Teaching of skills of Basketball – involvement of all the skills in game situation with teaching of rule of the game
7. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
8. Teaching of skills of Kabaddi – demonstration, practice of the skills, correction of skills, involvement in game situation
9. Teaching of advance skills of Kabaddi – involvement of all the skills in game situation with teaching of rule of the game
10. Teaching of skills of Ball Badminton – demonstration, practice of the skills, correction of skills, involvement in game situation
11. Teaching of skills of Ball Badminton – involvement of all the skills in game situation with teaching of rule of the game
12. Teaching of some of Asanas – demonstration, practice, correction and practice
13. Teaching of some more of Asanas – demonstration, practice, correction and practice
14. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
15. Teaching of skills of Table Tennis – demonstration, practice of skills, correction and practice and involvement in game situation
16. Teaching of skills of Table Tennis – involvement of all the skills in game situation with teaching of rule of the game
17. Teaching – Meaning, Scope and importance of Physical Education
18. Teaching – Definition, Type of Tournaments
19. Teaching – Physical Fitness and Health Education
20. Construction and laying out of the track and field (*The girls will have Tennikoit and Throw Ball).

**Semester II: Physical Education and Yoga Practices**

1. Teaching of skills of Hockey – demonstration practice of the skills and correction.
2. Teaching of skills of Hockey – demonstration practice of the skills and correction. And involvement of skills in games situation
3. Teaching of advance skills of Hockey – demonstration practice of the skills and correction. Involvement of all the skills in games situation with teaching of rules of the game
4. Teaching of skills of Kho-Kho – demonstration practice of the skills and correction.
5. Teaching of skills of Kho-Kho – demonstration practice of the skills and correction. Involvement of the skills in games situation
6. Teaching of advance skills of Kho-Kho – demonstration practice of the skills and correction. Involvement of all the skills in games situation with teaching of rules of the game
7. Teaching of different track events – demonstration practice of the skills and correction.
8. Teaching of different track events – demonstration practice of the skills and correction.
9. Teaching of different track events – demonstration practice of the skills and correction with competition among them.
10. Teaching of different field events – demonstration practice of the skills and correction.
11. Teaching of different field events – demonstration practice of the skills and correction.
12. Teaching of different field events – demonstration practice of the skills and correction.
13. Teaching of different field events – demonstration practice of the skills and correction with competition among them.
14. Teaching of different asanas – demonstration practice and correction.
15. Teaching of different asanas – demonstration practice and correction.
16. Teaching of different asanas – demonstration practice and correction.
17. Teaching of different asanas – demonstration practice and correction.
18. Teaching of weight training – demonstration practice and correction.
20. Teaching of calisthenics – demonstration practice and correction.

**Note:** 1) Compulsory Uniform: Half pants, Tee Shirts, Shoes and socks all white (Girls will have white Tee Shirt and Track pants) 2) The games mentioned in the practical may be interchanged depending on the season and facilities.
Minimum Standards for Establishing a College of Agriculture

1. **Degree Nomenclature:** B.Sc. (Hons.) Agriculture

2. **Eligibility Criteria:** 10+2 or intermediate with PCMB, PCB, PCM or Agriculture (P - Physics, C - Chemistry, M - Mathematics, B - Biology) from a recognised Board/University.

3. **Medium of Instruction:** English

4. **Minimum Intake:** 60 students per year

5. **Divisions/Departments/Sections**
   1. Agronomy
   2. Agricultural Economics and Statistics
   3. Agricultural Extension
   4. Agricultural Entomology
   5. Genetics and Plant Breeding
   6. Horticulture
   7. Agricultural Chemistry and Soil Science
   8. Plant Pathology
   9. Animal Husbandry and Dairying
   10. Agricultural Engineering
   11. Soil Conservation

**Note:** To reduce the number, the subjects which have only one or two courses may be merged with major Division/Department. Colleges/Universities have liberty to do this at their level. However, for practical purposes following model has been proposed giving minimum teaching staff required for each Division/Department taking into account the merger of related subjects.

6. **Divisions/Departments proposed along with Cadre-wise teaching staff required.**

   **Departments**
   1. Agronomy
   2. Agricultural Economics + (Maths & Computer Science and Statistics)
   3. Agricultural Extension & Communication + (Sociology and Psychology, English)
   4. Agricultural Entomology
   5. Genetics and Plant Breeding + (Seed Science & Bio-Technology)
   6. Horticulture
   7. Soil Science and Agricultural Chemistry + (Microbiology, Biochemistry, Environmental Sciences)
   8. Plant Pathology
   9. Animal Sciences including Fisheries, Food Science, Dairy Sciences & Poultry units
   10. Agriculture Engineering + (Farm Management)
   11. Soil Conservation (+Agroforestry+Agro-meteorology)

   **Total 31 3 8 20+14 45**

**Note:** Total strength after four years should have 45 teachers as faculty. However, in extreme cases, it can be 31 and few courses viz. Basic Sciences, and Humanities, Mathematics and Computer Sciences, etc. can be completed by hiring the teachers.
### 7. Infrastructure facilities (Floor space required)

1. Dean Office       1  20x24
2. P.A. Room         1  10x12
3. Committee Room with video conferencing facility 1  20x30
4. Assistant Administrative Officer including staff 1  20x12
5. Assistant Accounts Officer including staff 1  20x12
6. Assistant Academic Officer including staff 1  20x12
7. Exam Cell (300 capacity) 1  20x12
8. Evaluation Room 1  20x36
9. Faculty Room (Ladies) 1  10x12
10. Faculty Room (Gents) 1  20x12
11. Placement Cell 1  20x12
12. Smart Lecture Halls 5  40x30 (60 capacity)
13. Exam Hall Cum Auditorium 1  100x50
14. Library/Book Bank 1  30x72
15. Common Utility Room 1  20x36
16. Central Laboratory 1  50x36
17. Hostels including Mess, Gym/Indoor, Reading Room, Warden Room, Store etc. 1 (boys) 150, 1 (girls) 150
18. Canteen 120x12 (kitchen with store) 20x36 Seating
19. Wash room (with toilet & urinary facilities) 10 20x12 (keeping ladies requirements)
20. Parking space As per requirement
21. Farm stores, threshing yards including implements and tractor sheds, One core, complex
22. Vehicles Car 1 (Jeep/Car - staff 2, Bus 1, Pickup van 1, Motor Bikes 2, Minibus (30 capacity) 1, Tractors 2
23. Drinking water and irrigation facilities As per requirements
24. Vehicles shed 1  10x80

12. Chlorophyll Meter 01
13. Drip and Sprinkler System 03
14. Sprayer 03
15. Spring Balance 50 Kg 05
16. Spring Balance 10 Kg 05
17. Top Pan Balance 1 kg capacity 05
18. Top Pan Balance 2 kg capacity 05
19. Meter Scale 10
20. Tape 05
21. Brix meter 02

2. Agricultural Economics and Statistics + (Basic Economics, Maths. & Computer Science and Statistics)
   1. Computers 15
   2. Camera 01
   3. Software As per requirement

3. Agriculture Extension + (Sociology and Psychology, English) Audio-visual Lab
   1. LCD projector 1
   2. Camera (SLR) with zoom, wide-angle, tele-photo lens 1
   3. Video camera with tripod, lighting accessories and editing facility 1
   4. Computers (workstation) with editing softwares 1
   5. Digital voice recorders 5
   6. Audio recording-mixing consoles 1
   7. Computation softwares for statistics

4. Agricultural Entomology
   1. Binocular Microscope 20
   2. Insect Box 60
   3. Insect Collection Nets 60
   4. Collection Bottles 60
   5. Insect Collection Big Boxes for Museum (1 for each order) 29
   6. Insecticides for showing students/Representative for each group As per requirement
   7. Stereomicroscope 01
   8. Electronic Balance 01
   9. Soxhlet Extraction Apparatus 01
   10. Bee keeping equipment 01 Set
   11. Oven 01
   12. Patters/Tower 01
   13. Sprayers 01 of each type
   14. Light traps 01 set
   15. Fumigation Chamber 01
   16. Sides/cover slips as per requirement
   17. pH meter 01
   18. Computer with printer 01 set

5. Genetics and Plant Breeding + (Crop Physiology, Biotechnology, Seed Science & Technology)
   1. Microscope 10
   2. Binocular microscope 10
   3. Electronic Moisture Meter 02
   4. Electronic Balance 02
   5. Seed Germinator 02
   6. Automatic seed/grain counter 01
   7. Hot Air Oven 01
   8. BOD Incubator 01
   9. Fluorescence microscope 01
   10. Centrifuge 01
   11. Growth Chamber 01
   12. Distillation Assembly 01

6. Horticulture + (Food Science & Technology) a. Labs (Post Harvest)
   1. Hand Refractometer 05
   2. Digital Refractometer 02
   3. Oven 01
   4. Refrigerator 01
5. Electronic Weighing Balance 02
6. Pan Balance (1 kg & 10 kg. capacity each) 02
7. Deep Freezer 01
8. pH Meter 01
9. Fruit crusher 01
10. Grinding and Mixing Machine 01
11. Distillation Assembly 01
12. Seed Germinator 02
13. Grafting and budding knife 60
14. Secateur 60
15. Saw 05
16. Loppers 05
17. Mist Chamber 01
18. Poly house with drip irrigation system 02

Microscope 1

7. Agricultural Chemistry and Soil Science + (Biochemistry, Microbiology, Environmental Sciences)
1. Electronic Top pan balance (0.1 g capacity) 02
2. Electronic Top pan balance (1 mg capacity) 02
3. Hot air oven 02
4. pH Meter 05
5. EC Meter 05
6. Flame Photometer 01
7. Visible spectrophotometer 01

10. Water Bath 01
11. Rotary Shaker 02
12. Binocular Microscope 20
13. BOD Incubator 02
14. Autoclave 02
15. Laminar Air Flow 01
16. Microwave oven 01
17. Digestion block 02
18. Hydrometer 05
19. Infiltrometer 02
20. Hydraulic conductivity meter 01
21. Atterberg’s limit meter 05
22. Nitrogen Analyser 02
23. GPS 10
24. AWS 01
25. Lysimeter 01
26. Luxmeter 02
27. Solar Pyranometer 01
28. Nitrogen Distillation Unit 01
29. Chromatography equipment 01
30. Soil sampling tools 01 set
31. Moisture box 30
32. Moisture meter 05
33. Tube Auger 10
34. Bucket auger 10
35. Weighing Balance 01
36. Chlorophyl Meter 01
37. Centrifuge machine 01

8. Soil Conservation including Agro-meteorology and Agroforestry
1. Thermometer Max 05
2. Thermometer Min 05
3. Digital Anemometer 02
4. Cup Anemometer 02
5. Pan Evaporimeter 01
6. Soil thermometer 05 cm.10 cm.15 cm.05,05,05,
7. Rain gauge 01
8. Self-recording Rain gauge 01
9. Sunshine Recorder 01
10. Stevenson’s Screen 01
11. Thermograph 01
12. Hygrograph 01
13. Soil Heat Flux Plate 01

9. Plant Pathology
1. Microscope compound with photodisplay arrangement 03
2. Stereobinocular 05
3. Sample processing Board (Dry preservation of samples) 04
4. Wet preservation Jars 50
5. Autoclave 02
6. Oven 01
7. Deep Freeze 01
8. Centrifuge (3000 rpm) 01
9. Refrigerator 01
10. Water bath 02
11. Electronic balance 02
12. Weighing machine 01
13. Incubator 02
14. Occular meter 05
15. Stage Micrometer 05
16. Camera Lucida 05

10. Animal Husbandry and Dairying + Poultry
1. 5000/6500 Feed and Forage Analyzer 01
2. Hand and electric centrifuge 01
3. Analytical balance 01
4. Hot air oven 01
5. Micro kjeldahl N digestion & distillation apparatus 01
6. Soxhlet unit for fat estimation 01
7. Hot plate, Fiber Tech. 01
8. Vacuum pump 01
9. Willy mill grinder 01
10. Platform balance (100 kg cap) 01
11. Gerber centrifuge unit (for milk fat testing) 01
12. Milk analyzer (automatic) 01
13. Crude fiber estimation unit 01
14. Distilled water unit 01
15. Incubator cum hatcher 01
16. Brooder machine 01
17. Feeder 01
18. Waterer 01
19. Egg candling machine 01
20. Debeaker 01
21. Vaccinator 01
22. Milking machine As per requirements
23. Milking bucket As per requirement
24. Milking can As per requirements
25. Animal and bird identification tools As per requirement
26. Chaff cutter 01
27. Lactometer 01
28. Castrator 01
29. Shearer 01
30. Electric dehorner 01
31. Artificial vagina 01
32. Common medication device 01
33. Cattle crate 01

11. Agriculture Engineering
No. Items Nos.
1. Working models of MB plough, Disk plough and indigenous plough 2 sets each 01
2. Working model of different harrows Actual
3. Seed drill 01
4. Different types of threshing drums As per requirement
5. Working models of reaper and mowers 02
6. Different types of sprayers and dusters As per requirement
7. Cut model of CI & SI engine 01
8. Cut model of Tractor 01

12. Central Library and Information System
1. Internet Server 01
2. Intranet Server 01
3. Computers for Reading Hall 20
4. Heavy Duty Photocopiers 02
5. Computerized Issue and Catalogue Systems 02
6. Wi-Fi facility in college/library/hostels As per requirement
7. CCTV monitoring system for library 01
8. RFID and Access Control System (Optional) 01
9. Broadband Internet Connectivity with minimum speed of 1Gbps
